PURPOSE OF AMENDMENT

The purpose of this amendment is to respond to questions submitted by potential Offerors as follows:

Question 1

The average cost per application under the initial RFP was $\$60,500,000/846 = \$71,513.00$. The average cost per application based on Amendment #3 is $\$62,400,000/1070 = \$58,317.76$. These averages include program implementation costs. What data supports the reduction in the average cost per application by more than 20%?

Given the State's experience with recovery operations associated with the 2015 Severe Storm, the State believes efficiencies can be gained to reduce the time from disaster to recovery. A major portion of this is the advent of the Palmetto Disaster Recovery (PDR) operation currently funded by a FEMA grant. This effort has already garnered over 850 valid cases and enables the State to drastically reduce the intake period from 6 months in the previous storm to 90 days as stated in the current Hurricane Matthew Action Plan. Moreover, since the Federal Register has clearly dictated 80% of all recovery efforts will occur in one county, the State sees further taxpayer efficiencies when contracting for intake, eligibility, and construction operations. Additionally, given our experience in recovering from Severe Storm 2015, we believe the average home price repair cost is less than 50K per home. While the State expects intake and eligibility operations to validate PDR data and to validate any basic Estimated Cost of Recovery associated with a case, we believe the data will greatly enhance the process and reduce costs. In essence, the State will provide the selected Implementation Vendor over 1K cases upon selection. We have confidence this will be quality data; therefore greatly decreasing processing time and reducing the cost per application/project and increasing the number of citizen homes served.
