

Meaningful Involvement Plan

\$124,440,000
AWARD FROM EPA'S SOLAR FOR ALL PROGRAM TO THE STATE OF SOUTH CAROLINA

Planning Period

December 2024 - December 2025

Implementation Phase

January 2026 - April 2029

OBJECTIVES OF SC SOLAR FOR ALL

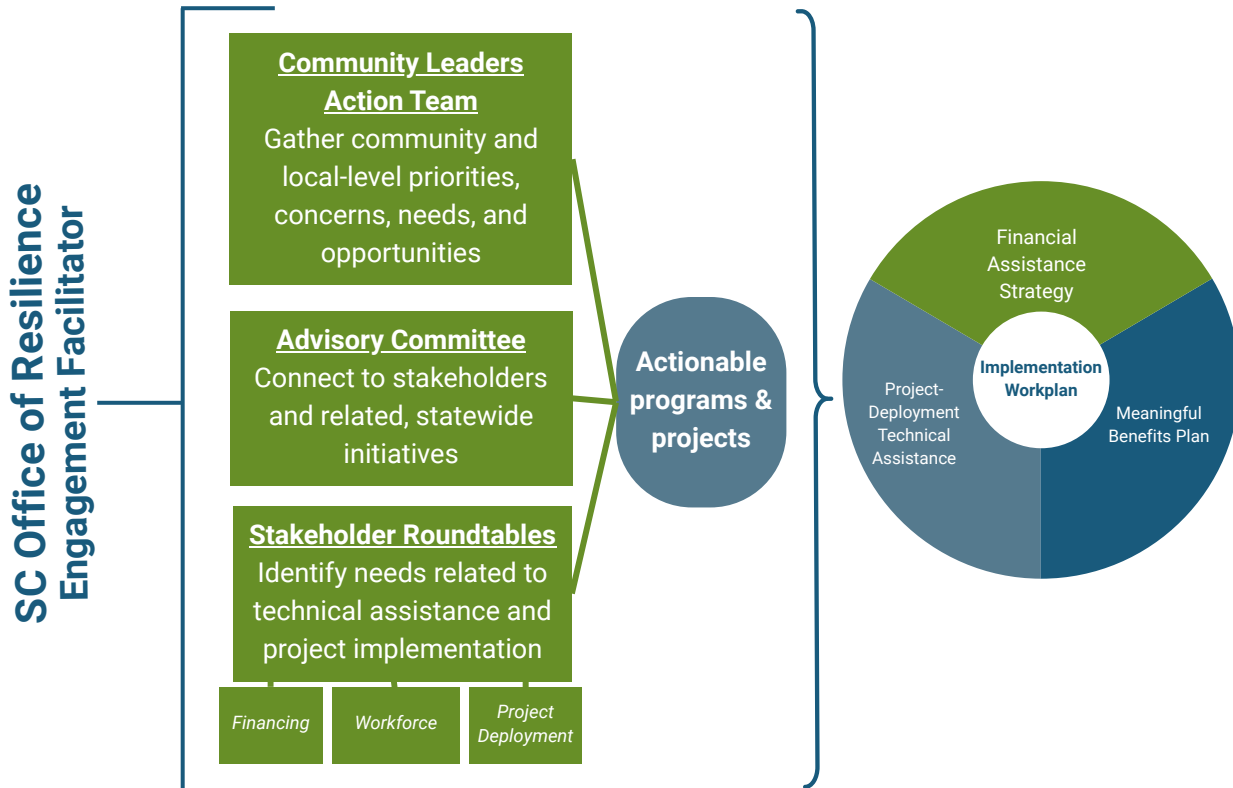

- Expand investment in and access to solar energy projects
- Reduce energy bills
- Enhance community resilience
- Provide workforce training opportunities

The SC Solar for All (SCSFA) Meaningful Involvement Plan serves as a framework for ongoing stakeholder engagement and two-way conversations throughout SCOR's Solar for All award. The Plan is considered a living document and may be modified as SCOR receives feedback and learns more about solar-related priorities from stakeholders and communities across the state.

During the SCSFA Planning Period, stakeholder engagement will be used to:

1. **Identify communities' solar-related priorities, interests, and concerns**
2. **Identify project types that will be most actionable during the term of SCOR's Solar for All award**
3. **Determine funding allocations for the SCSFA Community Solar Initiative and Solar Innovation Fund Grant Program**

SCSFA Engagement Process

SCOR is currently not accepting proposals or providing funding for solar projects. Offers of free or discounted solar due to the Solar For All program are likely inaccurate.

Please see the solar.sc.gov **Consumer Protections** page if you have questions or concerns about solar offerings.
