**Total Budget:**

\$162,188,000.00

## Disasters:

### Declaration Number

FEMA-4394-SC

FEMA-4286-SC

FEMA-4241-SC

## Narratives

### Mitigation Needs Assessment:

Within 4 years, 3 major storms have impacted the State of South Carolina, causing immense damage and several casualties. In October 2015, the state was devastated by over 20 inches of rainfall from an extratropical storm worsened by nearby Hurricane Joaquin, which caused significant flooding and storm damage throughout the state. A year later, Hurricane Matthew entered the state near McClellanville, South Carolina as a Category 1 Hurricane, unleashing strong winds and torrential rainfall throughout the eastern part of the state. Most recently, in September 2018, Hurricane Florence made landfall just north of South Carolina in Wrightsville Beach, North Carolina. While North Carolina experienced the worst of the storm, South Carolina suffered from heavy rainfall and flooding from the downriver watersheds shared with North Carolina. The effects of these storms will be felt for decades.

Despite advances in meteorology, it's impossible to know where a storm and its accompanying damage will exactly hit until it's often too late. However, we are able to identify and model the flood risk an area faces. Damage from these storms was not equally distributed. 30 out of 46 counties in South Carolina received CDBG-DR assistance from one of these three storms. 5 of these counties suffered damage from all three major storms. Most of the damage was centralized around the Pee Dee and Santee Watersheds. Having suffered through so many storms in a short period, South Carolina is striving to preemptively prevent or minimize future, avoidable damage. The State will focus its Mitigation efforts on counties within these regions in order to maximize the Mitigation Grant's benefits for South Carolinians.

### Proposed Use of Funds:

In 2018, Congress passed Public Law 115-123, which awarded \$12 billion to previous CDBG-DR grant recipients that were impacted by disasters from 2015 to 2017. Of this award, South Carolina is designated to receive \$157,590,000 in mitigation funds for the Most Impacted and Distressed (MID) counties from the 2015 Severe Storm disaster (Public Law 114-113) and the MID counties from the 2016 Hurricane Matthew disaster (Public Law 114-254). Additionally, Richland County will receive \$21,864,000, Lexington County will receive \$15,185,000, and the City of Columbia will receive \$18,585,000 in mitigation funds as a result of the 2015 Severe Storm (Public Law 114-113). In January 2021, the State received \$4,598,000 in additional mitigation funding to address unmet disaster recovery need. This was in response to the damage from Hurricane Florence (Public Law 115-123), which was not captured in the original Mitigation Grant award. In total, the people of South Carolina will be awarded \$217,822,000, with the State being responsible for \$162,188,000 of the awarded grants. Of this \$162,188,000, a minimum of \$50,978,000 must be spent in or for HUD-identified MID counties from the initial Public Law. Additionally, a minimum of \$2,299,000 must be spent in MID counties from the 2018 Hurricane Florence disaster, which include Dillon, Horry, and Marion counties. The remainder will be spent in counties identified as either SC-MID or HUD-MID.

With this grant, the State seeks to enhance mitigation efforts within the Pee Dee and Santee Watershed Area and prevent future avoidable flood damage. Part of this award will go towards mitigation for houses threatened by flooding. The State will create a buyout program to purchase flood-threatened houses and transform the land into protective flood plains. The State will provide funding and oversight to qualified units of general local government (UGLG) applicants. The program will primarily target the Low-to-Moderate Income (LMI) community with its housing efforts, as they are often unequally affected by storm damage. At the same time, it will aid those who display an Urgent Need (UN) to leave Flood-prone areas, especially if it helps the community at large. The State is cognizant of the difficulties of relocating to a new home and will allow for UGLGs to offer Housing Incentives to the LMI community when applicable. Once the houses have been bought out, the State plans to make the land ineligible for further development through conservation easements and transfer the land to another governmental, non-profit, or other entities. This will expand the drainage capacity of the local watershed and help protect the nearby community.

Additionally, some CDBG-MIT Grant funds will go towards infrastructure projects of applying UGLGs. Infrastructure projects must have or surpass a 1.0 Benefit Cost Analysis (BCA). Exceptions may be made for projects which primarily help the LMI community and have benefits that aren't captured by the BCA. The state will oversee the application and building process. Grant funds will also be made available for eligible FEMA-HMGP fund matching. The CDBG-MIT funds can be counted as the UGLG's portion of their match for FEMA-HMGP projects. The State will oversee the application process for providing these funds for the UGLG's FEMA-HMGP projects.

Also, a portion of the grant will go towards assisting UGLG's fund Hazard Mitigation Plans and flood reduction studies and maps. Some local governments may lack or have older flood maps or Hazard Mitigation Plans. By arming these UGLGs with up-to-date flood maps and Hazard Mitigation Plans, they will be able to make better informed decisions about developing near flood plains and be better prepared for future disasters.

**Activity Description:**

Since 2015, there have been three presidentially-declared disasters: 2015 Hurricane Joaquin, 2016 Hurricane Matthew, and 2018 Hurricane Florence. The bulk of the damage was not due to wind or storm surge, but from flooding. Due to a lack of flood maps or topographic changes, a significant number of homes were developed in what is now identified as the flood plain. While some homes are able to, at great cost, elevate or mitigate their flood risk; many, including the LMI community, face difficulty in storm proofing their homes or recovering from flood damage. Additionally, once identified as being within a flood zone or having been flood damaged, the homeowner faces great difficulty in selling their property at its pre-damage worth and moving to a safer location nearby. In order to preemptively lower the damage and costs to homes, communities, and local governments, the State is providing funding for units of general local government (UGLG) to buy out homes from the LMI community or those displaying an Urgent Need.

The buyout program, which has seen great success in other cities and states, seeks to achieve two main objectives. First, it seeks to lower or eliminate future damage and costs by investing in buying out homes in the flood plain. This will allow the bought-out homeowners to move to a safer location in the nearby community. LMI homeowners will be able to apply for moving assistance through a housing incentive that will help prevent them from being displaced with no property ownership. Second, once the houses are bought out, the UGLGs will demolish the homes and transform the land into part of the flood plain. This will assist the nearby community, as it increases the absorption of the nearby watershed and helps protect neighboring buildings. Once demolished, a covenant will be tied to the land that prevents any non-recreational future development. The UGLGs will retain ownership of the land and its maintenance responsibilities. If they desire, the land and its maintenance responsibilities can be transferred to other entities.

This activity will describe the application progress of the Buyout Program. A new activity will be created in DRGR each time the State awards a UGLG funds for their Buyout Activity.

### **Location Description:**

The Mitigation Grant will serve counties selected by HUD and the State that received significant damage from recent storms. HUD Most Impacted and Distressed (HUD MID): Charleston, Clarendon, Dorchester, Florence Georgetown, Horry, Marion, Sumter, and Williamsburg  
South Carolina Most Impacted and Distressed (SC MID): Berkeley, Calhoun, Chesterfield, Darlington, Dillon, Lee, Marlboro, and Orangeburg.

**Activity Description:**

The Town of Cheraw was initially awarded \$1,747,680.00 by the State for their Buyout program. The program seeks to lower housing stock from the 100 year floodplain that has been damaged by flooding from previous storms or are likely to be flooded from future storms. Applicants will receive an offer for the home's pre-storm damage fair market value and possibly receive a moving incentive. Once the house has been purchased, it will be demolished with a non-development covenant emplaced. This program seeks to reduce the housing stock that's at risk for serious flood damage, allow the homeowner to move to housing that's safer, and increases the floodplain, which will help reduce the risk of flooding nearby.

The program will be run by the State. Program Participation will be 100% voluntary. The activity will occur within Chesterfield county, which is classified as a South Carolina-identified Most Impacted and Distressed county.

**Location Description:**

Cheraw, South Carolina

**Activity Description:**

Horry County was originally awarded \$13,120,685.00 by the Governor's Appointed Committee for their Buyout program. The program seeks to lower housing stock from the 100 year floodplain that has been damaged by flooding from previous storms or are likely to be flooded from future storms. Applicants will receive an offer for the home's pre-storm damage fair market value and possibly receive a moving incentive. Once the house has been purchased, it will be demolished with a non-development covenant emplaced. This program seeks to reduce the housing stock that's at risk for serious flood damage, allow the homeowner to move to housing that's safer, and increases the floodplain, which will help reduce the risk of flooding nearby.

Program Participation will be 100% voluntary. The program will be run by the State and is located in Horry County, which is classified as a HUD-identified Most Impacted and Distressed County. This activity in DRGR will focus on properties whose households qualify as Low to Moderate Income.

### Activity Description:

This activity will cover the Demolition portion of the Horry County Buyout Program LMI applicants. Any structures on the purchased property will be demolished and a covenant will be emplaced to prevent future unallowed redevelopment. The State anticipates that all combined demolition costs associated with the

receiving UGLG will trigger Section 3.

**Activity Description:**

The City of Bennettsville seeks to address the repetitive flooding within its Shady Rest and Richardson Park neighborhoods, which sit within a floodplain, through a buyout program that will allow the residents to relocate

to a safer area. The buyout program has identified 51 possible properties across the two neighborhoods. Once the properties have been purchased, the properties' structures will be demolished and the land will be returned to undeveloped open space. This focused project is located in Marlboro county, a South Carolina-identified Most Impacted and Distressed County. The State will administer the project and originally awarded it \$4,933,255. This DRGR activity will focus solely on the Low to Moderate Income aspect of the project.

### Activity Description:

This activity will cover the Demolition portion of the City of Bennettsville Buyout Program LMI applicants. Any structures on the purchased property will be demolished and a covenant will be emplaced to prevent future unallowed redevelopment. The State anticipates that all combined demolition costs associated with the receiving UGLG will trigger Section 3.

**Activity Description:**

The City of Bennettsville seeks to address the repetitive flooding within its Shady Rest and Richardson Park neighborhoods, which sit within a floodplain, through a buyout program that will allow the residents to relocate

to a safer area. The buyout program has identified 51 possible properties across the two neighborhoods. Once the properties have been purchased, the properties' structures will be demolished and the land will be returned to undeveloped open space. This Low to Moderate Income focused project is located in Marlboro county, a South Carolina-identified Most Impacted and Distressed County. The State will administer the project and originally awarded it \$4,933,255. This DRGR activity will focus solely on the Urgent Need aspect of the project.

### Activity Description:

This activity will focus on the Low to Moderate Income (LMI) component of the Dillon County Buyout project. The project will be administered by the State and originally received a total grant award \$2,210,000. This specific DRGR Activity's budget represents all LMI related expenditures in connection to the Dillon County Buyout Program. Dillon County can be classified as either a State or a HUD-identified Most Impacted and Distressed County due to the two separate grants. Expenditures are classified as State or HUD-Most Impacted and Distressed depending on if they come out of the B-18-DP-45-0001 or B-19-DT-45-0001 grant allocations.

The State will administer and fund the buyout of six residential structures located within the boundaries of the special flood hazard area near the Little Pee Dee River. The properties previously received substantial damage from the impacts of Hurricane Florence and Hurricane Matthew and remain at risk of flooding from future storm events. The buildings will be acquired and demolished, with the land transformed into open space that will be allowed to revert back to its natural state. At no time will the State own the property. Rather, the property will be held by Dillon County or another local entity. The land will also have a covenant emplaced on the deed that will ban future commercial and residential development. Participation in the program is 100% voluntary.

Previously, this project used to be covered under a matching activity that planned to participate in FEMA's HMGP program. More information can be found in the General Federal Matching Activity. As part of the transition within DRGR, the Dillon County Buyout FEMA HMGP Match activity was edited and renamed as the Dillon County Buyout LMI activity, which now falls under the State's Buyout category. All funds and expenditures from the original project scope were transferred as well. A separate activity was created to track Urgent Need expenditures.

### Activity Description:

This activity will focus on the Urgent Need (UN) component of the Dillon County Buyout project. The project will be administered by the State and originally received a total grant award \$2,210,000. This specific DRGR

Activity's budget represents all UN related expenditures in connection to the Dillon County Buyout Program. Dillon County can be classified as either a State or a HUD-identified Most Impacted and Distressed County due to the two separate grants. Expenditures are classified as State or HUD-Most Impacted and Distressed depending on if they come out of the B-18-DP-45-0001 or B-19-DT-45-0001 grant allocations.

The State will administer and fund the buyout of six residential structures located within the boundaries of the special flood hazard area near the Little Pee Dee River. The properties previously received substantial damage from the impacts of Hurricane Florence and Hurricane Matthew and remain at risk of flooding from future storm events. The buildings will be acquired and demolished, with the land transformed into open space that will be allowed to revert back to its natural state. At no time will the State own the property. Rather, the property will be held by Dillon County or another local entity. The land will also have a covenant emplaced on the deed that will ban future commercial and residential development. Participation in the program is 100% voluntary.

Previously, this project used to be covered under a matching activity that planned to participate in FEMA's HMGP program. More information can be found in the general Matching Activity. As part of the transition to becoming a State-ran project within the Buyout Program, this activity was created to track UN expenditures in DRGR. The DRGR activity tracking LMI expenditures was the original Dillon County Buyout Matching activity prior to this change.

### Activity Description:

This activity will focus on the Low to Moderate Income (LMI) component of the Darlington County Buyout project. The project will be administered by the State and originally received a total grant award \$8,643,667.

This specific DRGR Activity's budget represents all LMI related expenditures in connection to the Darlington County Buyout Program. It is located in a State-identified Most Impacted and Distressed County.

The State has deemed 40 parcels, split between areas in Hartsville and near the City of Darlington, as eligible to participate in the 100 percent voluntary buyout program of homes impacted by flooding. A significant number of these homes are located within flood zones. Once the identified properties have been purchased, they will undergo demolition and have a permanent deed restriction or covenant that will maintain the properties as either open and public greenspace, wetlands, or other beneficial floodplain restorations. These deed restrictions and covenants will last in perpetuity, with restrictions imposed on the use of land. The State will facilitate the transfer of property from the eligible property owners to Darlington County but will at no time hold possession of the property.

**Activity Description:**

UPDATE: Action Plan Ammendment 5 split the Planning Activity into two different programs instead of one consolidated activity. The general Planning activity will focus on statewide planning activities and studies, as

well as any changes to the Mitigation Action Plan. The Plans and Studies Programs will focus on providing funding and assistance for Units of Local Governments to develop or update hazard mitigation plans, as well as develop flood reduction studies. Within DRGR, the Plans and Studies Program was the original Planning activity and has since been recategorized and edited to become the Plans and Studies Program. This activity, the general Planning Activity was newly created. Additionally, please note that both the general Planning and the Plans and Studies Program Activities will not exceed 15 percent of the total mitigation grants.

The State will utilize planning funds from this activity for the development and amendment of the Mitigation Action Plan. Funds may also be used for statewide planning activities and studies that provide data for use in developing or amending the Action Plan. Combined, the Plans and Studies Program and the Planning activities will not exceed 15 percent of the total grant.

In addition, Community Outreach and Input will be addressed within this activity. In preparation for the grant, the State held 4 public hearings in the Mitigation Grant counties in order to receive public input. The State also strives to meet monthly for its Stakeholder meetings in order to inform its government agency partners, assisting volunteer organizations, and the general public about the CDBG-DR and CDBG-MIT programs run by the State.

In addition, Community Outreach and Input for the grant will be addressed within this activity. In preparation for the grant, the State held 4 public hearings in the Mitigation Grant counties in order to receive public input. The State also strives to meet quarterly for its Stakeholder meetings in order to inform its government agency partners, assisting volunteer organizations, and the general public about the CDBG-DR and CDBG-MIT programs run by the State.

### Location Description:

The Mitigation Grant will serve counties selected by HUD and the State that received significant damage from recent storms. HUD Most Impacted and Distressed (HUD MID): Charleston, Clarendon, Dorchester, Florence Georgetown, Horry, Marion, Sumter, Dillon, and Williamsburg  
 South Carolina Most Impacted and Distressed (SC MID): Berkeley, Calhoun, Chesterfield, Darlington, Lee, Marlboro, and Orangeburg.

**Activity Description:**

UPDATE: Action Plan Ammendment 5 split the Planning Activity into two different programs instead of one consolidated activity. The general Planning activity will focus on statewide planning activities and studies, as well as any changes to the Mitigation Action Plan. The Plans and Studies Programs will focus on providing funding and assistance for Units of Local Governments to develop or update hazard mitigation plans, as well as develop flood reduction studies. Within DRGR, this specific activity was the original Planning activity and has since been recategorized and edited to become the Plans and Studies Program. The General Planning Activity will be a newly created activity. Additionally, please note that both the general Planning and the Plans and Studies Program Activities will not exceed 15 percent of the total mitigation grants.

The Plans and Studies Program seeks to provide funding to units of local governments located within SC and HUD identified Most Impacted and Distressed counties and to State agencies for the development or updating of Hazard Mitigation Plans and the development of flood reduction studies to identify future potential projects that can be funded by the Infrastructure program. The program will also fund studies to identify the potential impacts of sea level rise and flood related hazards. Information about the approved Plans and Studies can be found below.

**South Carolina Emergency Management Division's Hazard Identification and Risk Assessment**

The Statewide Hazard Identification and Risk Assessment (HIRA) seeks to collect data and analyze it to better understand the impacts of disaster events within the State. This assessment will help inform goals and objectives that will guide state agencies in determining mitigation actions and prioritizing projects that most effectively reduce harm to life and property. Conducting the HIRA is a requirement to completing the State Hazard Mitigation Plan Update, which must be up to date in order to participate in FEMA Hazard Mitigation programs. The South Carolina Emergency Management Division (SCEMD) has been awarded \$109,030 in CDBG-MIT funds. In total, SCEMD expects to spend \$400,000 to complete the HIRA.

**Marion County Stormwater Master Plan**

In March 2021, Marion County's Stormwater Master Plan was awarded \$500,000.00 by the State. Marion County has dealt with significant flooding caused by storms and the confluences of the Great Pee Dee, Little Pee Dee, and Lumber Rivers. The plan seeks to identify flooding issues throughout the county, assess the stormwater system within the county, and eventually use this information to identify and develop mitigation infrastructure projects that can alleviate flooding. Following the completion of the Stormwater Master Plan, Marion will use the information and data acquired to prepare for future infrastructure projects. The creation of the plan will be administered by the State. Marion County is a HUD-identified Most Impacted and Distressed County.

**Town of Pamplico Stormwater Study**

The State awarded \$500,000 to the Town of Pamplico's Stormwater Study. The activity will be administered by the State, who will utilize contractors to anyze data and create stormwater models. The project will involve collecting GIS and Survey data to create hydrologic and hydraulic mdels of 2, 10, 50, and 100 year 24 hour storm events. Currently, old and inadequately sized stormwater structures allow for runoff to stand in roadways and surrounding properties during storms with heavy precipitation. The findings of the study will be used to identify infrastructure projects that can address this problem. The town of Pamplico is located in Florence County, a HUD Identified MID County.

**Town of Mayesville Stormwater Study**

The Town of Mayesville was awarded \$105,000 for its Stormwater Study. This activity will be administered by the State, who will utilize contractors to create a hydrology study to understand the movement and distribution of stormwater within the incorporated area of Mayesville. The Town of Mayesville is located between tod zones and faces inadequate drainage during major storms, which cause flood damage to town facilities and private property, as well as creating hazardous conditions for its residents. This study will later be used to identify future flood mitigation projects. The town of Mayesville is located in Sumter County, a HUD Identified MID County.

**City of Conway Stormwater Master Plan**

The City of Conway was awarded \$305,000 for its Stormwater Master Plan. This activity will be administered by the City Subrecipient. The City will contract with an engineering firm to inventory and survey the existing storm drainage system, delineate watersheds, create hydraulic modeling of 2 through 100 year 24 hour storm events, and create a final report that will highlight problem areas and include recommendations for improving the stormwater system. The City of Conway is located in Horry County, a HUD Identified MID County.

**City of Florence Stormwater Master Plan**

The City of Florence was awarded \$500,000 for its Stormwater Master Plan project. This plan will replace the

City's outdated 1974 Stormwater master plan, which is based on outdated development trends, technologies, and stormwater mitigation strategies of the time. Additionally, the city has developed significantly since the 1974 plan and is in need of an up to date Stormwater Master Plan. Within recent years, Hurricanes and major storms have caused flooded roadways, impeded emergency response, and caused public and private property damage. The Stormwater Master Plan will be used to inform the City of future projects that could mitigate their current flooding issues. The City of Florence will administer this activity as a subrecipient. The City of Florence is located in Florence County, a HUD Identified MID County.

#### Darlington County Watershed Study

Darlington County's Watershed Study seeks to analyze local flooding from stormwater, local stream and creeks, and ground inundation, as well as identify and develop mitigation plans and projects. The study will encompass the county and impact approximately 66,618 residents. While local groups have attempted to complete watershed studies in smaller communities, a county-wide study led by local government has not been conducted. The State will administer this Watershed Study and has assigned it a budget of \$300,000. The LMI percentage for the area is 41.43%. Darlington is a State-identified MID county.

#### The City of Orangeburg's Stormwater Drainage Study

The City of Orangeburg seeks to conduct a Stormwater Drainage Study that will determine future improvement projects within LMI areas of the city. Previously, these areas have suffered from frequent and repetitive damages to their homes and properties from stormwater. The study will focus exclusively on the LMI areas which include crucial roadways around Magnolia Street and John C. Calhoun Boulevard, and the Railroad Corner. The study will beneficially impact around 12,861 people. The Study will be conducted by the State and is assigned a budget of \$300,000. The LMI percentage of the study's area is 54%. The City of Orangeburg is located in a State-identified MID county.

#### The Town of Summerton's Hydraulic and Hydrology Study

The Town of Summerton's seeks to conduct a hydraulic and hydrology study to determine the extent and distribution of stormwater within the incorporated area of the town and to identify future mitigation projects that can address possible flood and storm damage. The LMI percentage of the study is 69%. The Study's budget is set at \$150,000 and will be administered by the State. Summerton is located in Clarendon, a HUD-identified MID county.

#### The Citadel's Multi-Hazard Mitigation Plan Update

The Citadel is a Military College located in Charleston, SC. It is seeking to update its Multi-Hazard Mitigation Plan which was originally written and adopted in 2017. In order to maintain its Disaster Resistance University Status and remain eligible for future disaster relief funding, the Multi-Hazard Mitigation Plan must be updated every five years. The Plan is expected to cost \$44,000. The Citadel will contribute \$11,000 to the project, with the State providing \$33,000. The location of the study is in Charleston, a HUD-identified MID county.

#### The Georgetown and Williamsburg Counties Hydrologic and Hydraulic Study

The Georgetown and Williamsburg Counties Hydrologic and Hydraulic study seeks to assess the existing drainage conditions and identify improvements throughout both counties. Specifically, this study will assess the existing drainage systems, develop, assess, and prioritize projects, and establish an implementation strategy for such projects that will improve the drainage system and mitigate against future flooding throughout Georgetown and Williamsburg Counties. The State will administer this study and has awarded the project \$900,750. The area covered by this study is located in HUD-identified Most Impacted and Distressed Counties.

#### Horry County Buck Creek and Simpson Creek Watersheds Hydrologic and Hydraulic Study

Horry County's Buck Creek and Simpson Creek Watersheds Hydrologic and Hydraulic Study will focus on one of the three main focus areas from Horry County's Flood Resilience Master Plan. It seeks to identify potential projects that will improve the drainage system and reduce potential flood impacts throughout the Buck Creek and Simpson Creek Watersheds. The study will identify and prioritize a list of projects that include traditional infrastructure projects and natural stormwater solutions that could include projects that remove existing structures from the landscape and reclaim natural areas. This study will be administered by the Subrecipient and has been awarded \$750,000 by the State. The area covered by the study is located in a HUD-identified Most Impacted and Distressed County.

#### Orangeburg County Hydrologic and Hydraulic Study

Orangeburg County's Hydrologic and Hydraulic Study seeks to examine flooding issues and identify projects that can reduce future damage. The study will assess existing drainage systems; develop, assess, and prioritize projects; and establish an implementation strategy for such projects that will improve the drainage system and mitigate against future flooding throughout Orangeburg County. This study will be run by the State and has been awarded \$450,000. The area covered by the study is located in a South Carolina-identified Most Impacted and Distressed County.

#### Town of James Island Creek Basin Drainage Master Plan

The Town of James Island is seeking to create a Hydrologic and Hydraulic Study that will aid in the creation of a Drainage Master Plan. The study will focus on the James Island Creek Basin, which was identified as a priority in a previous study. The result of this plan will be the development of a stormwater management plan for that basin that can be used to inform future programs and projects. The State has awarded the project \$150,000 and will administer the study. The Town of James Island is located in Charleston County, a HUD identified Most Impacted and Distressed County.

#### Chesterfield County Hydrologic and Hydraulic Study

Chesterfield County seeks to create a Hydrologic and Hydraulic Study to assess existing drainage conditions across the county, with a specific focus on the towns of Chesterfield and Patrick. Additionally, it will be used to develop, assess, and prioritize potential projects and establish an implementation strategy that will improve drainage and mitigate against future flooding. This study will be run by the State and has been awarded \$500,000. Chesterfield is a South Carolina identified Most Impacted and Distressed County.

#### Calhoun County Hydrologic and Hydraulic Study

Calhoun County seeks to create a Hydrologic and Hydraulic Study to address inadequate road drainage and flooding throughout the county. The county has identified two focus areas, the Town of Cameron and the unincorporated community of Sandy Run. The State has awarded this study \$350,000 and will administer the study. Calhoun is a South Carolina identified Most Impacted and Distressed County.

#### Town of Lamar Stormwater Master Plan

This project will cover the Town of Lamar's Stormwater Master Plan, which seeks to address decades of severe flooding. The plan will identify and quantify existing flood conditions throughout the town and recommend mitigation solutions and projects that would minimize or eliminate flooding.

This project will occur in a South Carolina-identified Most Impacted and Distressed County. The State awarded the project \$145,200.00 and will administer the study.

#### Town of Society Hill Stormwater Master Plan

This project will cover the Town of Society Hill Stormwater Master Plan, which seeks to address decades of severe flooding. The plan will identify and quantify existing flood conditions throughout the town and assist the town in identifying and quantifying storm water projects that will minimize or eliminate flooding within the town.

This project will occur in a South Carolina-identified Most Impacted and Distressed County. The State awarded the project \$138,800.00 and will administer the study.

#### Santee-Lynches COG Hazard Mitigation Plan Update

Santee-Lynches COG Hazard Mitigation Plan Update was awarded \$80,650 by the Mitigation Special Case Panel in December 2022. The Santee Lynches Council of Governments is one of ten regional, sub-state districts within South Carolina and is comprised of Clarendon, Kershaw, Lee, and Sumter counties. This project will focus on updating their FEMA approved Hazard Mitigation Plan, which is currently out of date and risks creating further community vulnerability from Natural Hazard Events. The plan update will be administered by the State and will serve both HUD and State-identified MID counties.

#### Town of Pinewood Hydrologic and Hydraulic Study

The Town of Pinewood Hydrologic and Hydraulic Study was awarded \$150,000 by the Mitigation Special Case Panel in October 2022. The Town of Pinewood experiences perennial flooding from storm events that damage public and private property, as well threatening residents' safety. A hydrologic and hydraulic study is needed to identify both the causes of the flooding and potential mitigation projects that can address it. The Study will be administered by the State. The Town of Pinewood is located in Sumter, a HUD identified MID county.

#### Williamsburg County Comprehensive Plan

The Williamsburg County Comprehensive Plan was awarded \$144,000.00 in August 2023. The plan will include an analysis of Williamsburg County's land use, population, housing, economy, transportation, cultural resources, community facilities, resilience and natural resources, capital needs, in accordance with the comprehensive planning requirements defined by the South Carolina Local Government Planning and Enabling Act. The planning process will include community meetings and public input gathering to identify preferred development alternatives for future growth and investment. The Study will be administered by the State. Williamsburg is classified as a HUD identified Most Impacted and Distressed County.

Update: Georgetown County has withdrawn its Comprehensive Plan application from the CDBG-MIT program. No funds were drawn for this project.

### Location Description:

The Mitigation Grant will serve counties selected by HUD and the State that received significant damage from recent storms. HUD Most Impacted and Distressed (HUD MID): Charleston, Clarendon, Dorchester, Florence Georgetown, Horry, Marion, Sumter, Dillon, and Williamsburg  
South Carolina Most Impacted and Distressed (SC MID): Berkeley, Calhoun, Chesterfield, Darlington, Lee, Marlboro, and Orangeburg.

**Activity Description:**

Marion County seeks to reduce flood damage by future storms through elevating residential structures above the Base Flood Elevation. The project is being funded by FEMA's HMGP, which utilizes a 75% Federal and 25%

Local cost share to assist local governments. The State has awarded this project \$542,172.50, which will cover the Local match portion of the HMGP grant. This Urgent Need matching project will be administered by the subrecipient and will occur within a HUD-identified Most Impacted and Distressed County.

### Activity Description:

This activity will cover the Federal Funds Match for Georgetown County Andrews Local Flood Reduction Study. Phase I of the study was completed in November 2020, which consisted of a feasibility study, Hydraulic and Hydrologic model, and design drawings. Phase II will include demolition of existing stormwater infrastructure when applicable and the construction of an improved storm drainage system, which will involve adding new pipe, installing new drainage ditches, manholes, and inlets. Additionally Phase II will include installing sidewalks, improving existing drainage ditches, and repairing roads. The total cost for the project will be \$4,885,368, with the FEMA HMGP Federal cost share consisting of \$3,664,026. The Local cost share for this project is \$1,221,342. The State will contribute \$1,136,865, with Georgetown being responsible for the remaining cost share.

Georgetown is a HUD identified Most Impacted and Distressed County. Over 50% of the project area’s population consists of Low to Moderate income households. The activity will be administered by the subrecipient.

**Activity Description:**

This activity will cover the Federal Funds Match for the City of Bennettsville Crooked Creek Stormwater Study. The Study will consist of Inventorying and surveying the existing stormwater drainage system, delineating watersheds, hydraulic modeling, and the creation of a Final Report and Stormwater Master Plan. The project’s area consists of more than 50% Low to Moderate Income households. The State has awarded the project \$56,250, which will count as the project’s Local Match. The total cost of the Study will be \$225,000, with \$168,750 of that amount being covered by the Federal cost share.

Bennettsville is located in Marlboro County, a South Carolina Identified Most Impacted and Distressed County. The activity will be administered by the subrecipient.

**Activity Description:**

This activity will cover the Phase 1 match for Mt Pleasant's Hobcaw Basin project. Phase 1 will consist of Hydraulic and Hydrologic modeling, a design survey, final design, permitting, and development of construction plans. Phase 1 has been approved for an HMGP grant and the State will cover the local cost share amount of \$180,278.66. The Hobcaw Basin project will be administered by the subrecipient. This project will occur in a HUD-identified Most Impacted and Distressed County.

**Activity Description:**

This activity will cover the Town of Cheraw's FEMA Hazard Mitigation Grant Program Match. The Town of Cheraw seeks to create a Stormwater Master plan that will identify existing flooding hazards and recommend hazard mitigation strategies. The plan update will include data gathering, field investigation, modeling and flood hazard assessment, and flood hazard mitigation planning. The project has a total budget of \$263,450, with a federal cost-share of \$197,587.50 and a local cost-share of \$65,862.50.

The State will run the activity and assist the Town of Cheraw by providing the local cost-share of \$65,862.50. The activity is based within Chesterfield county, which is classified as a South Carolina-identified Most Impacted and Distressed county.

**Activity Description:**

Update: The City of Dillon Stormwater Management Plan has been completed and is publicly available. Besides the earlier link, the Plan can be found at the URL below, under the Match Category Tab.

This activity will cover the City of Dillon's FEMA Hazard Mitigation Grant Program Match. The City of Dillon seeks to create a Stormwater Management Plan focused solely on the city. This plan will become an annex to the preexisting Hazard Mitigation Plan for Dillon County. The current Hazard Mitigation Plan does not go into depth about specific flooding mitigation for the City. The total project will be \$240,000, with the Federal cost-share being \$180,000 and the Local cost-share being \$60,000. The State will provide the \$60,000 for the local cost-share and conduct the study.

This activity will be administered by the State. As allowed by Public Law for 2018 Disasters, the State is able to expand the Most Impacted and Distressed (MID) category from the Zip Code level to the rest of the County it resides in. This means that Dillon is now a HUD-identified MID County.

**Activity Description:**

This activity will focus on Dillon County's FEMA Hazard Mitigation Grant Program Match. Dillon County seeks to create a flood management study to determine the best course of action to mitigate and alleviate water

damage amongst its communities. The county is also requesting that the study become the Flood Management Annex to the Dillon County Hazard Mitigation Plan. The project has a total budget of \$100,000, with the Federal cost-share at \$75,000 and the local cost-share at \$25,000.

The State will provide the \$25,000 local cost-share and will conduct the study. Also, as allowed by Public Law for the 2018 Disasters, the State is able to expand the Most Impacted and Distressed (MID) category from the Zip Code level to the rest of the County it resides in. Because of this, Dillon county is now classified as a HUD-identified MID county.

## Activity Description:

This activity will focus on the Federal Funding Match for South Carolina Emergency Management Division's (SCEMD) Hazard Mitigation Plan. This plan will also receive funding from FEMA's Pre-Disaster Mitigation (PDM) Program, which utilizes a Local-Federal cost-sharing strategy to assist local and state governments fund mitigation projects. The State has awarded SCEMD with \$30,750.00 in CDBG-MIT funds, which will go towards the 25% Local portion of the cost-share. Combined with PDM's Federal cost-share, the State Hazard Mitigation Plan Update is budgeted at \$123,000.

SCEMD plans to utilize these funds to update the State Hazard Mitigation Plan to reflect new and updated data and information since the previous five-year plan approved in 2018. State Hazard Mitigation Plans are valid for five years and the current one will expire by 2023. SCEMD will complete the plan, go through the approval process, and adopt it no later than October 1st, 2023.

**Activity Description:**

In order to increase storm and flood defenses, the State will provide funds for infrastructure projects to units of general local government (UGLG). In order to receive funding, UGLGs must apply with a detailed plan of what their projects and must receive the State's approval of their project. All projects must undergo a Benefit Cost Analysis (BCA) and must meet the requirement scores. An exception to this may be made for projects that provide noteworthy benefits to the LMI community that aren't easily captured by the BCA. The goal of these infrastructure projects is to better protect local communities from preventable flood damage. These projects will be overseen by the State, but administered by UGLGs.

This specific activity will focus on the application process of the UGLG projects and track their progression. All infrastructure funds will be held in this activity until they are allocated to a specific infrastructure project. Once the projects have been approved, a new activity will be created to track the narrative, financial, and statistical progress of the infrastructure project. The State will divide this activity into three funding phases, with the first phase will provide funding for "shovel-ready" projects that can begin relatively soon.

**Location Description:**

The Mitigation Grant will serve counties selected by HUD and the State that received significant damage from recent storms. HUD Most Impacted and Distressed (HUD MID): Charleston, Clarendon, Dorchester, Florence Georgetown, Horry, Marion, Sumter, Dillon, and Williamsburg  
 South Carolina Most Impacted and Distressed (SC MID): Berkeley, Calhoun, Chesterfield, Darlington, Lee, Marlboro, and Orangeburg.

**Activity Description:**

Update: The activity budget was increased in early 2024 to include a better estimate of the Activity Delivery Costs incurred by the State for the project.

This Activity will focus on the City of Sumter's Crosswell Stormwater Infrastructure project, which was originally awarded \$2,104,636.00. The City will add in \$750,000, making the Grand Total Project budget \$2,854,636. The Crosswell Neighborhood has experienced flooding during everyday storms, with additional stress caused by large tropical storms. The project seeks to address this by increasing capacity of the existing storm drain lines and adding approximately 13,000 linear feet of new storm drain lines and inlets.

The infrastructure project will occur in Sumter County, which is a HUD-identified Most Impacted and Distressed County. It will be run by the City of Sumter.

**Activity Description:**

This Activity will focus on the City of Sumter's Lafayette Stormwater Infrastructure project, which seeks to address flooding along Mile Branch between Lafayette Drive and US Highway 76. The scope of work includes constructing a new stormwater conveyance that's approximately 3,900 linear feet. Additionally, an existing 48" Corrugated Metal Pipe trunk line will be replaced with a new 60" Reinforced Concrete Pipe that will provide additional capacity and last longer. A 60" outfall will be installed as well, which will replace the area's currently undersized one.

The City of Sumter was originally awarded \$1,515,089.00 by the State and will administer the project. The infrastructure project will occur in Sumter County, which is a HUD-identified Most Impacted and Distressed County.

Update: In March 2024, the budget was adjusted to better reflect projected Activity Delivery Costs incurred by the State and other budgetary increases for the project.

### Activity Description:

Update: In March 2024, the budget was adjusted to better reflect projected Activity Delivery Costs incurred by the State and other budgetary increases for the project.

Update: Due to increased costs from inflation, the project budget has been increased to \$1,584,688.00.

This Activity will focus on the City of Sumter's Miller Road Infrastructure Project, which seeks to create a new stormwater conveyance system to alleviate flooding in the area between Jackson Street, Broad Street, Miller Road, and Morgan Avenue in Sumter, SC. The lack of an outfall to Shot Pouch Branch is contributing to the flooding. The project will involve replacing the existing 48" Corrugated Metal Pipe storm drain outfall with 2,600 feet of new 54" Reinforced Concrete Pipe outfall and inlets.

The City of Sumter was awarded \$1,230,000.00 by the State and will administer the project. The infrastructure project will occur in Sumter County, which is a HUD-identified Most Impacted and Distressed County.

### Activity Description:

Update: In March 2024, the budget was adjusted to better reflect projected Activity Delivery Costs incurred by the State and other budgetary increases for the project.

Update: During 2022, the City of the Isle of Palms requested an amendment to the scope of their approved CDBG-MIT Infrastructure project, which would involve adding 423 feet of pipe to the previously proposed storm drain pipes and extending the pipes to the limits of the SCDOT right of way of 41st Avenue. The Mitigation Special Case Panel approved their change order request, which increased the project's awarded amount to \$2,125,800.00.

The City of Isle of Palms Stormwater Infrastructure Project seeks to minimize and eliminate wide spread flooding throughout the City. The Isle of Palms has experience increased occurrences of flooding due to heavy rainfall events, extreme high tides, sea level rise, high-water table conditions, and intense coastal storms. These conditions, combined with an inadequate drainage system and the low lying topography of the island, have create flooding conditions throughout the City. The Infrastructure project will focus on the area surrounding the 41st Avenue Outfall. This infrastructure project is classified as Urgent Need and will be administered by the State. The Urgent Need project was awarded \$1,396,700 and is located in a HUD-identified Most Impacted and Distressed County.

**Activity Description:**

UPDATE: Due to similarities in geography, effects, and goals, the Second Street and Washington activities were merged together into the Town of Cheraw's Stormwater Infrastructure Project. Within DRGR, this was done by removing the 5145 Cheraw Washington activity and merging the finances and narratives to the Second Street activity. This activity was renamed as the Town of Cheraw's Stormwater Infrastructure Project.

Second Update: Despite all the similarities, enough differences exist administratively to split the projects back into two separate activities. All project updates, budgets, and information will be reported with their respective project activity in DRGR.

Third Update: In March 2024, the budget was adjusted to better reflect projected Activity Delivery Costs incurred by the State and other budgetary increases for the project.

The Town of Cheraw, using the information and data obtained from their Stormwater Master Plan, has identified several projects that can reduce damage from flooding and stormwater. The Second Street project area starts at the intersection of Second and Third Street and stops near the intersection of Second and Powe Street. Drainage improvements will include 35 storm drainage structures, 3,246 linear feet of stormwater pipe, 10,814 linear feet of curbing, and 4,773 square yards of required paving/resurfacing and is expected to provide around 155 acres of drainage relief for the town. The Low to Moderate Income focused project will be administered by the State and will occur within a South Carolina-identified Most Impacted and Distressed County.

### Activity Description:

UPDATE: Due to similarities in geography, effects, and goals, the Second Street and Washington activities were merged together into the Town of Cheraw's Stormwater Infrastructure Project. Within DRGR, this was done by removing the 5115 Cheraw Washington activity and merging the finances and narratives to the Second Street activity. This activity was renamed as the Town of Cheraw's Stormwater Infrastructure Project.

Second Update: Despite all the similarities, enough differences exist administratively to split the projects back into two separate activities. All project updates, budgets, and information will be reported with their respective project activity in DRGR.

Third Update: In March 2024, the budget was adjusted to better reflect projected Activity Delivery Costs incurred by the State and other budgetary increases for the project.

The Town of Cheraw, using the information and data obtained from their Stormwater Master Plan, has identified several projects that can reduce damage from flooding and stormwater. This activity will focus on the Washington and RR Stormwater Infrastructure project. This project will begin by upsizing the downstream pipes under the Washington Street dirt road and CSX railroad, with project improvements continuing near the intersection of Front and Marlboro Streets and follow a general path around Church Street. The project will then branch off from the trunk line at Third Street and end at the intersection of Third and Market Street. The trunk line improvements will end on Green Street near Cheraw First Baptist Church. The project will provide approximately 190 acres of drainage relief to the town, which include building 51 storm drainage structures, installing 5,800 linear feet of stormwater pipe, rehabilitating 606 linear feet of preexisting stormwater pipe, and 18,695 square yards of required paving and resurfacing.

### Activity Description:

Update: In March 2024, the budget was adjusted to better reflect projected Activity Delivery Costs incurred by the State and other budgetary increases for the project.

Horry County seeks to address flooding from Socastee Creek, which has caused flooding from the 2015 Severe Storm, 2016 Hurricane Matthew, and 2018 Hurricane Florence disasters and cut off access to several local roads. Utilizing a grant provided by SCDHEC, Horry County initiated a study to address the flooding and discovered that waterflow is impeded as it passes under the McCormick Road. This project will construct a supplemental culvert under McCormick Road that would reduce the amount of water that is backed up during flood events. This Urgent Need project has been awarded \$846,450.00. It will occur in a HUD-identified Most Impacted and Distressed County and will be administered by the subrecipient.

**Location Description:**

McCormick Road at the Socastee Creek Crossing.

In Unincorporated Horry County, close to Myrtle Beach, South Carolina.

The Project will directly affect the Socastee and Forestbrook areas

**Activity Description:**

Update: In March 2024, the budget was adjusted to better reflect projected Activity Delivery Costs incurred by the State and other budgetary increases for the project.

The City of Florence seeks to upgrade the stormwater infrastructure, which includes pipes, inlets, and junction boxes, within the vicinity of North Church Street and Oakland Avenue. Within this drainage basin there is little stormwater infrastructure within some areas, much of which is undersized for the area's needs. The project upgrades will provide efficient drainage to the area and help prevent future property damage, road closures, and road repair from flooding and water damage. This project has been awarded \$3,073,304.00. The subrecipient will administer the Low to Moderate Income focused project, which is based within a HUD-identified Most Impacted and Distressed County.

### Activity Description:

Update: In March 2024, the budget was adjusted to better reflect projected Activity Delivery Costs incurred by the State and other budgetary increases for the project.

Dillon County seeks to improve the storm drainage infrastructure of the Riverdale Community, which is undersized and needs to be replaced with additional drainage capacity. The work will include around 5,500 linear feet of open channel and ditch widening as well as 1,000 linear feet of storm drainage lines and culvert crossings. This project was one of the projects identified within Dillon County's Stormwater Study. The State has awarded \$1,420,000.00 to the project. The project will be administered by the State and will focus on the area's Low to Moderate Income population. It will occur within a HUD-identified Most Impacted and Distressed County.

### Activity Description:

Q1 2024 Update: The three portions of the City of Dillon Stormwater Improvement Project must recombined in

order to best meet program requirements. Within DRGR, all available funds will be transferred to what was formerly the Lucius portion of the project. Drawdowns that were already made will be transferred over to the recombined project activity through voucher revisions. Once all funds and draws have successfully been transferred to the new recombined activity, the Railroad and Dargan portions of the Infrastructure project will be canceled in DRGR.

The City of Dillon Stormwater Improvement project was recombined to handle the synergetic projects located at Lucius Road, Dargan Street to Washington Street, and Railroad Crossing to South Railroad Avenue. Utilizing information acquired from its Stormwater Management Plan, the City of Dillon seeks to reduce flooding around the Dargan Street, Lucius Road, and South Railroad Avenue areas. This activity will focus on the Lucius Road project, which will work in synch with the Dargan and Railroad activities. The three project areas will improve stormwater drainage in a large part of the City by conveying runoff through the outfall to Maple Swamp. All three areas are located in the largest and mostly densely populated watershed in the City and serve the Low to Moderate Income population. The projects will also assist and work in conjunction with future City Stormwater Infrastructure projects.

The portion of the project around Lucius Road seeks to improve drainage that enters the Lucius Road Outfall, which will convey the water to Maple Swamp. The project will involve improving the culverts underneath Lucius road and increasing the capacity of the Lucius Drainage Channel. It will add 1 new 48 inch pipe, lower an existing 48 inch, lower the existing TRICO waterline, and widen the Channel from Lucius to Highway 301.

The portion of the project Dargan to Washington Street seeks to replace the existing pipes with 1,032 Linear Feet of 60 inch pipe, 392 Linear Feet of 54 inch pipe, 786 Linear Feet of 48 inch pipe, 546 Linear Feet of 42 inch pipe, and 280 Linear feet of 18 inch pipe. These upgrades will increase the capacity of a main stormwater outfall that connects to Lucius Road Outfall.

The portion of the project around Railroad Crossing at South Railroad Avenue seeks to install new pipes under the railroad to increase capacity. It will replace the existing 48 inch of pipe from Lucius Channel to E. Earl Street and 4th Avenue with 185 Linear Feet of 60 inch RCP, replace 24 inch pipe extending west along E. Earl Street from S. 4th Avenue to the open ditch along the north side of 4th Avenue with 445 Linear Feet of 60 inch RCP, Increase capacity for the 250 Linear Feet of roadside ditch extending west along the North side of E. Earl Street or replace it with 60 inch pipe, and replace the existing 30 inch pipe crossing underneath the CSX Railroad and the existing pipes and ditch that go to the intersection of S. 1st Avenue and W. Earl Street with 560 Linear Feet of 60 inch RCP.

This project will be administered by the State and will serve the Low to Moderate Income community within the area. Since the project uses funds from the B-19-DT-45-0001 and the B-18-DP-45-0001 allocations, the project is both a HUD identified and State identified Most Impacted and Distressed (MID) project. The status of the HUD identified MID funding will be determined by the funding source. Expenditures from B-18-DP-45-0001 will be counted as State identified MID, since that allocation is based on the 2015 and 2016 Disaster Recovery Grants. Expenditures from B-19-DT-45-0001 will be counted as HUD identified MID, since the allocation is based on the 2018 Disaster Recovery Grant.

Below is the Activity information from when it solely focused on the City of Dillon Lucius Stormwater portion of the project.   
~~Update: Due to the synchronous nature of the projects, three City of Dillon Stormwater Infrastructure projects were combined in DRGR. Despite all the similarities, enough differences exist administratively to split the projects back into three separate activities. This was done by editing the original City of Dillon Stormwater Infrastructure DRGR activity to solely focus on the Lucius project and creating two additional activities for the City of Dillon's Dargan Street and Railroad Crossing projects. All project updates, budgets, and information will be reported within their respective project activity in DRGR. The City of Dillon has been awarded \$952,000.00 for its Lucius Outfall Stormwater Infrastructure Project. The City has identified the Lucius Road Outfall as a major influence on flood conditions for the City and seeks to address this by adding an additional 48 inch pipe, lowering a preexisting 48 inch culvert pipe that runs underneath Lucius Road, lowering a preexisting TRICO water line that runs along Lucius Road, and widening the Lucius Drainage Channel from Lucius Road to Highway 301. Because of the downstream nature of the site, this one will be constructed first to allow stormwater to clearly flow to the ultimate outfall of Maple Swamp. This project will work in synch with its fellow City of Dillon Dargan Street and Railroad Crossing Infrastructure projects.~~

**Activity Description:**

Update: In March 2024, the budget was adjusted to better reflect projected Activity Delivery Costs incurred by the State and other budgetary increases for the project.

This activity will focus solely on the city of Charleston's Medical District Drainage Tunnel Extension at Ehrhardt Street. The city was originally awarded \$9,964,190.00 for this infrastructure project by the Governor's Appointed Committee. The area is routinely impacted by substantial flooding that can prevent patients, emergency vehicles, and staff from reaching the hospital during a storm. In just 2019, the medical district had 89 flood events.

The tunnel will run beneath Ehrhardt Street on the Medical University of South Carolina's campus towards President and Cannon Streets. Water will go through this tunnel until it reaches the city's Spring/Fishburne drainage improvement project. The infrastructure project will be run by the city of Charleston. Charleston is a HUD-identified Most Impacted and Distressed County.

### Activity Description:

Q1 2024 Update: The three portions of the City of Dillon Stormwater Improvement Project must be recombined in order to best meet program requirements. Within DRGR, all available funds will be transferred to what was

formerly the Lucius portion of the project. Already made drawdowns will be transferred over to the recombined project activity through voucher revisions. Once all funds and draws have successfully been transferred to the new recombined activity, the project will be canceled out in DRGR.

~~Update: Due to the synchronous nature of the projects, three City of Dillon Stormwater Infrastructure projects were combined in DRGR. Despite all the similarities, enough differences exist administratively to split the projects back into three separate activities. This was done by editing the original City of Dillon Stormwater Infrastructure DRGR activity to solely focus on the Lucius project and creating two additional activities for the City of Dillon's Dargan Street and Railroad Crossing projects. All project updates, budgets, and information will be reported within their respective project activity in DRGR.~~

The City of Dillon has been awarded \$1,936,000.00 for its Dargan Street Stormwater Infrastructure project. The City has identified the Lucius Road Outfall as a major influence on flood conditions for the City and desires to limit flooding through three infrastructure projects. This specific project seeks to replace the preexisting 40 inch pipe from the Lucius Discharge Channel tie in to the intersection of E. Dargan Street and US Highway 301, replace the preexisting 30 inch pipe extending north up US Highway 301 to the intersection of E. Hampton Street with 1,032 LF of 60 inch pipe, replace the preexisting 30 inch pipe along E. Hampton Street with 692 LF of 54 inch pipe that extends to the intersection of E. Hampton and S. 6th Avenue, replace the preexisting 24 inch pipe along S. 6th Avenue that extends to the intersection of E. Harrison Street with 786 LF of 48 inch pipe, replace the preexisting 20 inch pipe along S. 6th Avenue that extends from the intersection of E. Harrison to the Intersection of E. Washington Street with 546 LF of 42 inch pipe, and replace the preexisting 12 inch lateral pipes at the intersection of E. Harrison and N. 6th Avenue with 280 LF of 18 inch pipe.

This project will be administered by the State and will serve the Low to Moderate Income community within the area. Because the funding of this project comes from the B-19-DT-45-0001 allocation, it is categorized as a HUD identified Most Impacted and Distressed project.

### Activity Description:

Q1 2024 Update: The three portions of the City of Dillon Stormwater Improvement Project must be recombined in order to best meet program requirements. Within DRGR, all available funds will be transferred to what was formerly the Lucius portion of the project. Already made drawdowns will be transferred over to the recombined project activity through voucher revisions. Once all funds and draws have successfully been transferred to the new recombined activity, the project will be canceled out in DRGR.

~~Update: Due to the synchronous nature of the projects, three City of Dillon Stormwater Infrastructure projects were combined in DRGR. Despite all the similarities, enough differences exist administratively to split the projects back into three separate activities. This was done by editing the original City of Dillon Stormwater Infrastructure DRGR activity to solely focus on the Lucius project and creating two additional activities for the City of Dillon's Dargan Street and Railroad Crossing projects. All project updates, budgets, and information will be reported within their respective project activity in DRGR.~~

The City of Dillon has been awarded \$958,000.00 for its Dargan Street Stormwater Infrastructure project. The City has identified the Lucius Road Outfall as a major influence on flood conditions for the City and desires to limit flooding through three infrastructure projects. This specific project seeks to replace the preexisting 48 inch pipe extending south from Lucius Channel to E. Earl Street and 4th Avenue with 185 LF of 60 inch RCP, replace the preexisting 24 inch pipes extending west along E. Earl Street from S. 4th Avenue to the open ditch along the north side of 4th Avenue with 445 LF of 60 inch RCP, either increase the capacity for the 250 LF of roadside ditch that extends west along the north side of E. Earl Street or replace it with 60 inch pipe, and replace the preexisting 30 inch pipe that crosses underneath the CSX Railroad and the other pipes ditch that goes to the intersection of S. 1st Avenue and W. Earl Street with 560 LF of 60 inch RCP.

This project will be administered by the State and will serve the Low to Moderate Income community within the area. Because the funding of this project comes from the B-19-DT-45-0001 and the B-18-DP-45-0001 grants, this project will be considered both a State and HUD identified Most Impacted and Distressed project. Costs will be appropriately identified as State or HUD MID based off which grant the funding comes from respectively.

**Activity Description:**

Update: When the City of Manning scoped the project in 2020, they did not have a Hydrologic and Hydraulic study of the city and corresponding watersheds. This project was approved by the Steering Committee with the understanding that the scope and cost of the project would change during the design phase. Following the project approval, AECOM entered into a contract with the State to design, permit, and inspect construction engineering of stormwater infrastructure to alleviate flooding in 8 specific areas, as well as create an H and H study. The new designs include extending pipes, rerouting existing pipe runs, increasing capacity, and providing outfalls further downstream so the increased amount of water does not move the problem further downstream. These changes were approved in 2022 by the Mitigation Special Case Panel, with the total project award now being \$8,249,719.00.

2nd Update: Based on the increased scope of the project and the different geographic areas being served, the City of Manning Stormwater Project will be split into three project phases that focus on separate geographic areas. Phase 2 will focus on the areas around Mills and Huggins Streets, Dinkins and Church Streets, and on S. Church Street between Huggins and Winfield Drive. This DRGR activity will now only focus on the progress and costs associated with Phase 2.

3rd Update: In March 2024, the budget was adjusted to better reflect projected Activity Delivery Costs incurred by the State and other budgetary increases for the project.

This activity will focus solely on the City of Manning's Stormwater Improvement Infrastructure project. The Storm Drainage Improvements seeks to address flooding caused by an unnamed tributary of the Pocotaligo River by clearing and snagging unpipied sections, installing storm drain pipelines, culverts, and other new drainage structures. The State has awarded the City of Manning's project with \$4,979,555.00. The project will be run by the city. The City of Manning is located within Clarendon county, which is a HUD-identified Most Impacted and Distressed County.

**Activity Description:**

Update: When the City of Manning scoped the project in 2020, they did not have a Hydrologic and Hydraulic study of the city and corresponding watersheds. This project was approved by the Steering Committee with the understanding that the scope and cost of the project would change during the design phase. Following the project approval, AECOM entered into a contract with the State to design, permit, and inspect construction engineering of stormwater infrastructure to alleviate flooding in 8 specific areas, as well as create an H and H study. The new designs include extending pipes, rerouting existing pipe runs, increasing capacity, and providing outfalls further downstream so the increased amount of water does not move the problem further downstream. These changes were approved in 2022 by the Mitigation Special Case Panel, with the total project award now being \$8,249,719.00.

2nd Update: Based on the increased scope of the project and the different geographic areas being served, the City of Manning Stormwater Project will be split into three project phases that focus on separate geographic areas. Phase 1 will focus on the areas of Brooks and Memorial, Collins and Boyce, Keith and Walker, and Gibbons and Mill. This DRGR activity will now only focus on the progress and costs associated with Phase 1.

3rd Update: In March 2024, the budget was adjusted to better reflect projected Activity Delivery Costs incurred by the State and other budgetary increases for the project.

This activity will focus solely on the City of Manning's Stormwater Improvement Infrastructure project. The Storm Drainage Improvements seeks to address flooding caused by an unnamed tributary of the Pocotaligo River by clearing and snagging unpipied sections, installing storm drain pipelines, culverts, and other new drainage structures. The State has awarded the City of Manning's project with \$4,979,555.00 and will be administered by the State. The City of Manning is located within Clarendon county, which is a HUD-identified Most Impacted and Distressed County.

### Activity Description:

Update: In March 2024, the budget was adjusted to better reflect projected Activity Delivery Costs incurred by the State and other budgetary increases for the project.

This activity will focus solely on the Lake City Highway 52 Storm Drain Improvements project. It seeks to improve and enhance approximately 5750 linear feet of stormwater ditches and 3640 linear feet of stormwater pipes. The project will remove the existing inadequate drainage infrastructure. Lake City completed Phase 1A of its stormwater drainage goal in 2019, using \$755,212.71 from Penny Tax revenues. It seeks to use CDBG-MIT funds to complete Phase 1 and Phase 2 of its drainage project. The project will benefit the community by allowing surface flow to move more efficiently through the improved infrastructure and help prevent road flooding.

The remaining part of Phase 1 and Phase 2 will run by the State. Originally, the project has been awarded \$2,847,660.00. The Lake City Highway 52 Storm Drain Improvements project will take place in Florence County, which is a HUD-identified Most Impacted and Distressed County.

**Activity Description:**

Update: In March 2024, the budget was adjusted to better reflect projected Activity Delivery Costs incurred by the State and other budgetary increases for the project.

This activity will focus on the City of Florence's McQueen Street Stormwater Infrastructure project. The City seeks to upgrade the 1930's era stormwater drainage system that serves the westside of downtown Florence and the neighborhoods along the South McQueen Street corridor. The project will involve repairing and upgrading the trunk line, upgrading and increasing the size of stormwater inlets, and upsizing or repairing drainage branch lines. This project will also work in synergy with another CDBG-MIT project at West Cedar Street.

The project is based out of Florence County, which is a HUD-identified Most Impacted and Distressed County. The City of Florence will administer the project and has been awarded \$2,685,334.00.

### Activity Description:

Update: In March 2024, the budget was adjusted to better reflect projected Activity Delivery Costs incurred by the State and other budgetary increases for the project.

This activity will focus on the Mingo Pond Stormwater Infrastructure Project. Georgetown County seeks to prevent flooding and standing water along US-17 by installing 675 linear feet of new drainage infrastructure, a new pond outfall structure, and perform ditch maintenance on existing ditches in Pawleys Island. US Highway 17 is the primary north and south evacuation route going through Georgetown County and has previously faced standing water for several days because of storms.

The project will occur in Georgetown County, which is identified as a HUD Most Impacted and Distressed County. The project will be run by the State and has a budget of \$939,529.02.

**Activity Description:**

Update: In March 2024, the budget was adjusted to better reflect projected Activity Delivery Costs incurred by the State and other budgetary increases for the project.

This Activity will focus on Horry County's Cowford Swamp Channel Infrastructure project. Horry County was originally awarded \$1,582,500.00 for this project. The Bucksport community faces flooding conditions when flood waters back up from the Pee Dee River into Cowford Swamp and the unnamed wetland tributary. The project will construct a tributary relief channel/culvert that would direct flood waters to an unnamed tributary wetland to the west and to the Waccamaw River, which has historically had lower water elevation changes than the Pee Dee River. This project will work in synergy with the Big Bull Landing Road CDBG-MIT project.

The project will be run by Horry County, which is a HUD-identified Most Impacted and Distressed County.

# Grantee Activity Number: 519 Big Bull Landing 10010344

## Activity Title: Horry County Big Bull Landing Road

**Activity Type:**

MIT - Public Facilities and Improvements-Non Covered

**Project Number:**

51 - Infrastructure

**Projected Start Date:**

03/09/2021

**Benefit Type:**

N/A

**National Objective:**

Low/Mod

**Activity Status:**

Under Way

**Project Title:**

Infrastructure Projects

**Projected End Date:**

08/19/2032

**Completed Activity Actual End Date:**

**Responsible Organization:**

Horry County

**Activity Description:**

Update: In March 2024, the budget was adjusted to better reflect projected Activity Delivery Costs incurred by the State and other budgetary increases for the project.

This Activity will focus on Horry County's Big Bull Landing Road Infrastructure project. Horry County was originally awarded \$893,750.00 for this project. Bucksport, the community where Big Bull Landing Road is located, receives significant flooding when the Pee Dee backs up from storms. Horry County seeks to elevate Big Bull Landing Road to the adjacent high point grades that would make flooding less likely. It will also create a levee/dam on the existing drainage feature to prevent backup from the Pee Dee River.

The project will be run by Horry County, which is a HUD-identified Most Impacted and Distressed County.
