

# Grantee: South Carolina Office of Resilience

## Grant: P-18-SC-45-MIT1

October 1, 2022 thru December 31, 2022

---

<b>Grant Number:</b> P-18-SC-45-MIT1	<b>Obligation Date:</b>	<b>Award Date:</b>
<b>Grantee Name:</b> South Carolina Office of Resilience	<b>Contract End Date:</b>	<b>Review by HUD:</b> Reviewed and Approved
<b>Grant Award Amount:</b> \$162,188,000.00	<b>Grant Status:</b> Active	<b>QPR Contact:</b> Alexander Boe
<b>LOCCS Authorized Amount:</b> \$0.00	<b>Estimated PI/RL Funds:</b>	
<b>Total Budget:</b> \$162,188,000.00		

### Disasters:

#### Declaration Number

FEMA-4241-SC  
FEMA-4286-SC  
FEMA-4394-SC

### Narratives

#### Mitigation Needs Assessment:

Within 4 years, 3 major storms have impacted the State of South Carolina, causing immense damage and several casualties. In October 2015, the state was devastated by over 20 inches of rainfall from an extratropical storm worsened by nearby Hurricane Joaquin, which caused significant flooding and storm damage throughout the state. A year later, Hurricane Matthew entered the state near McClellanville, South Carolina as a Category 1 Hurricane, unleashing strong winds and torrential rainfall throughout the eastern part of the state. Most recently, in September 2018, Hurricane Florence made landfall just north of South Carolina in Wrightsville Beach, North Carolina. While North Carolina experienced the worst of the storm, South Carolina suffered from heavy rainfall and flooding from the downriver watersheds shared with North Carolina. The effects of these storms will be felt for decades.

Despite advances in meteorology, it's impossible to know where a storm and its accompanying damage will exactly hit until it's often too late. However, we are able to identify and model the flood risk an area faces. Damage from these storms was not equally distributed. 30 out of 46 counties in South Carolina received CDBG-DR assistance from one of these three storms. 5 of these counties suffered damage from all three major storms. Most of the damage was centralized around the Pee Dee and Santee Watersheds. Having suffered through so many storms in a short period, South Carolina is striving to preemptively prevent or minimize future, avoidable damage. The State will focus its Mitigation efforts on counties within these regions in order to maximize the Mitigation Grant's benefits for South Carolinians.

#### Proposed Use of Funds:

In 2018, Congress passed Public Law 115-123, which awarded \$12 billion to previous CDBG-DR grant recipients that were impacted by disasters from 2015 to 2017. Of this award, South Carolina is designated to receive \$157,590,000 in mitigation funds for the Most Impacted and Distressed (MID) counties from the 2015 Severe Storm disaster (Public Law 114-113) and the MID counties from the 2016 Hurricane Matthew disaster (Public Law 114-254). Additionally, Richland County will receive \$21,864,000, Lexington County will receive \$15,185,000, and the City of Columbia will receive \$18,585,000 in mitigation funds as a result of the 2015 Severe Storm (Public Law 114-113). In January 2021, the State received \$4,598,000 in additional mitigation funding to address unmet disaster recovery need. This was in response to the damage from Hurricane Florence (Public Law 115-123), which was not captured in the original Mitigation Grant award. In total, the people of South Carolina will be awarded \$217,822,000, with the State being responsible for \$162,188,000 of the awarded grants. Of this \$162,188,000, a minimum of \$50,978,000 must be spent in or for HUD-identified MID counties from the initial Public Law. Additionally, a minimum of \$2,299,000 must be spent in MID counties from the 2018 Hurricane Florence disaster, which include Dillon, Horry, and Marion counties. The remainder will be spent in counties identified as either SC-MID or HUD-MID.

With this grant, the State seeks to enhance mitigation efforts within the Pee Dee and Santee Watershed Area and prevent future avoidable flood damage. Part of this award will go towards mitigation for houses threatened by flooding. The State will create a buyout program to purchase flood-threatened houses and transform the land into protective flood plains. The State will provide funding and oversight to qualified units of general local government (UGLG) applicants. The program will primarily target the Low-to-Moderate Income (LMI) community with its housing efforts, as they are often unequally affected by storm damage. At the same time, it will aid those who display an Urgent Need (UN) to leave Flood-prone areas, especially if it helps the community at large. The State is cognizant of the difficulties of relocating to a new home and will allow for UGLGs to offer Housing Incentives to the LMI community when applicable. Once the houses have been bought out, the State plans to make the land ineligible for further development through conservation easements and transfer the land to another governmental, non-profit, or other entities. This will expand the drainage capacity of the local watershed and help protect the nearby community.

Additionally, some CDBG-MIT Grant funds will go towards infrastructure projects of applying UGLGs. Infrastructure projects must have or surpass a 1.0 Benefit Cost Analysis (BCA). Exceptions may be made for projects which primarily help the LMI community and have benefits that aren't captured by the BCA. The state will oversee the application and building process. Grant funds will also be made available for eligible FEMA-HMGP fund matching. The CDBG-MIT funds can be counted as the UGLG's portion of their match for FEMA-HMGP projects. The State will oversee the application process for providing these funds for the UGLG's FEMA-HMGP projects.

Also, a portion of the grant will go towards assisting UGLG's fund Hazard Mitigation Plans and flood reduction studies and maps. Some local governments may lack or have older flood maps or Hazard Mitigation Plans. By arming these UGLGs with up-to-date flood maps and Hazard Mitigation Plans, they will be able to make better informed decisions about developing near flood plains and be better prepared for future disasters.

## Overall Progress Narrative:

This Quarterly Progress Report (QPR) is the 9th published for grant number P-18-SC-45-MIT1, which includes grants B-DP-18-45-0001 and B-DT-19-0001, by the state of South Carolina, who is the first amongst its 2015 CDBG-DR cohort to finish their grant. The South Carolina Office of Resilience through the South Carolina Disaster Recovery Division (the State) will discuss its progress between 1 October and 31 December in the QPR below. The efforts of the State reflect a grant it received from the Department of Housing and Urban Development (HUD) to help mitigate risks associated with the natural disasters that occurred nationwide in 2015, 2016, 2017, and 2018.

The State of South Carolina received \$162,188,000 in Community Development Block Grant Mitigation (CDBG-MIT) funds to increase flood and storm mitigation within the 18 HUD and State identified Most Impacted and Distressed (MID) counties. As part of Amendment 2 to the Action Plan, the State has changed how it allocated funds across its 4 program pillars. Currently, \$100 million is dedicated to Infrastructure projects, \$37,318,892.59 is dedicated to Buyout Programs, \$2,681,107.41 is dedicated to matching federal programs, and \$14,078,600 is dedicated to Planning, which includes Plans and Studies. These programs will either be run by the State or by the applying subrecipient.

As of December 31st, the State has awarded \$100,441,876.54 to Units of General Local Government and other state agencies, approximately 62% of the \$162 million mitigation funds. Additionally, the State has allocated \$51,635,578.50, approximately 32% of the total grant, to benefit Low to Moderate Income communities. The increased award amount is largely thanks to the recent application period for Buyout Programs, which led to 3 new projects receiving awards this quarter. The State continues to review Plans and Studies applications on a rolling, yearlong basis, with 1 project being approved this quarter. It will host another Infrastructure application period during April and May of this year. The Federal-Funded Matching pillar is no longer accepting applications and has awarded 100% of its budget as of Amendment 2 to the Action Plan. During this Quarter, it approved 3 Plans and Studies project and 1 Federal Funds Matching project. Due to one of the Plans and Studies project being approved right before the end of the quarter, it will be added in DRGR next quarter.

Additional budget changes occurred in conjunction with the Amendment 2 changes. The majority of Matching activities had a 2.5 percent buffer built into the DRGR budget that was removed. The buffer was part of an older strategy to address project over runs and budget concerns when the grant first started out. Since then, the State has adopted a spread out phase-based system for its bigger budget Infrastructure and Buyout projects and will utilize change orders to address project budget overruns. Since the 2.5 percent buffer was on top of the awarded amount and only reflected in the DRGR budget, its removal will have zero effect on the award amount for projects. Combined with the Amendment 2 changes, the removal of the buffer created several negative budget changes that can be seen in the financial portion of the QPR.

Section 3 reporting under the new CFR 24 Part 75 rules is now being done through the Quarterly Progress Report in the Disaster Recovery Grant Reporting system. The State will be responsible for reporting all labor hours, Section 3 labor hours, and Targeted Section 3 hours in the QPR. Section 3 hours will be reported in their respective activities. This quarter, one project qualified as a Section 3 project with reportable hours.

The State continues to take action to affirmatively further fair housing throughout our CDBG-DR and CDBG-MIT programs by consistently showing concentrated efforts to serve the LMI population. In addition to serving the LMI population, the State continues to prioritize the needs of the elderly, disabled, and female-headed households.

The contract report required by Public Law 115-254 and Public Law 116-20 is attached to the Administration Activity.

## Project Summary

**Activity Description:**

This activity will cover the general administration of the program by the South Carolina Office of Resilience.

**Location Description:**

The Mitigation Grant will serve counties selected by HUD and the State that received significant damage from recent storms.

HUD Most Impacted and Distressed (HUD MID): Charleston, Clarendon, Dorchester, Florence Georgetown, Horry, Marion, Sumter, Dillon, and Williamsburg

South Carolina Most Impacted and Distressed (SC MID): Berkeley, Calhoun, Chesterfield, Darlington, Lee, Marlboro, and Orangeburg.

**Activity Progress Narrative:**

Drawdowns completed this quarter were for the general administration of this program.

### Activity Description:

Since 2015, there have been three presidentially-declared disasters: 2015 Hurricane Joaquin, 2016 Hurricane Matthew, and 2018 Hurricane Florence. The bulk of the damage was not due to wind or storm surge, but from flooding. Due to a lack of flood maps or topographic changes, a significant number of homes were developed in what is now identified as the flood plain. While some homes are able to, at great cost, elevate or mitigate their flood risk; many, including the LMI community, face difficulty in storm proofing their homes or recovering from flood damage. Additionally, once identified as being within a flood zone or having been flood damaged, the homeowner faces great difficulty in selling their property at its pre-damage worth and moving to a safer location nearby. In order to preemptively lower the damage and costs to homes, communities, and local governments, the State is providing funding for units of general local government (UGLG) to buy out homes from the LMI community or those displaying an Urgent Need.

The buyout program, which has seen great success in other cities and states, seeks to achieve two main objectives. First, it seeks to lower or eliminate future damage and costs by investing in buying out homes in the flood plain. This will allow the bought-out homeowners to move to a safer location in the nearby community. LMI homeowners will be able to apply for moving assistance through a housing incentive that will help prevent them from being displaced with no property ownership. Second, once the houses are bought out, the UGLGs will demolish the homes and transform the land into part of the flood plain. This will assist the nearby community, as it increases the absorption of the nearby watershed and helps protect neighboring buildings. Once

demolished, a covenant will be tied to the land that prevents any non-recreational future development. The UGLGs will retain ownership of the land and its maintenance responsibilities. If they desire, the land and its maintenance responsibilities can be transferred to other entities.

This activity will describe the application progress of the Buyout Program. A new activity will be created in DRGR each time the State awards a UGLG funds for their Buyout Activity.

### **Location Description:**

The Mitigation Grant will serve counties selected by HUD and the State that received significant damage from recent storms. HUD Most Impacted and Distressed (HUD MID): Charleston, Clarendon, Dorchester, Florence Georgetown, Horry, Marion, Sumter, and Williamsburg  
South Carolina Most Impacted and Distressed (SC MID): Berkeley, Calhoun, Chesterfield, Darlington, Dillon, Lee, Marlboro, and Orangeburg.

### **Activity Progress Narrative:**

The Mitigation Steering Committee met during Quarter 4 2022 to review and approve Buyout projects. As a result, 3 new Buyout activities and 1 project recategorization from Federal Funds Matching were approved. As of December 31st, the State has awarded \$36.3 million, approximately 97 percent of its total Buyout budget, to 7 Buyout projects. During this Quarter, the Mitigation Action Plan Amendment 2 was created, which transferred funds from the Federal Funds Matching pillar to the Buyout Pillar.

**Activity Description:**

The Town of Cheraw was awarded \$1,747,680.00 by the State for their Buyout program. The program seeks to lower housing stock from the 100 year floodplain that has been damaged by flooding from previous storms or are likely to be flooded from future storms. Applicants will receive an offer for the home's pre-storm damage fair market value and possibly receive a moving incentive. Once the house has been purchased, it will be demolished with a non-development covenant emplaced. This program seeks to reduce the housing stock that's at risk for serious flood damage, allow the homeowner to move to housing that's safer, and increases the floodplain, which will help reduce the risk of flooding nearby.

The program will be run by the State. Program Participation will be 100% voluntary. The activity will occur within Chesterfield county, which is classified as a South Carolina-identified Most Impacted and Distressed county.

**Location Description:**

Cheraw, South Carolina

**Activity Progress Narrative:**

Real Estate Closings for the project have been scheduled. The State continues to communicate with DHEC and the EPA due to the nature of the project. It has been advised by the EPA that additional soil testing is required. Next quarter, the State will work on the further development of the environmental process for the project.

**Activity Description:**

Horry County was awarded \$13,120,685.00 by the Governor’s Appointed Committee for their Buyout program. The program seeks to lower housing stock from the 100 year floodplain that has been damaged by flooding from previous storms or are likely to be flooded from future storms. Applicants will receive an offer for the home’s pre-storm damage fair market value and possibly receive a moving incentive. Once the house has been purchased, it will be demolished with a non-development covenant emplaced. This program seeks to reduce the

housing stock that's at risk for serious flood damage, allow the homeowner to move to housing that's safer, and increases the floodplain, which will help reduce the risk of flooding nearby.

Program Participation will be 100% voluntary. The program will be run by the State and is located in Horry County, which is classified as a HUD-identified Most Impacted and Distressed County. This activity in DRGR will focus on properties whose households qualify as Low to Moderate Income.

### **Location Description:**

Horry County, SC

### **Activity Progress Narrative:**

As of December 2022, 31 homes have been acquired. 3 homeowners from Intake Round 1 are awaiting offers and 2 homeowners who have completed signing are awaiting closing. There are currently 10 properties in Round 2. It met is December 2022 30 home milestone was met earlier this quarter in October. This activity will focus on the Low to Moderate Income applicants within the Buyout program. Additionally, the activity budget was changed to reflect the higher amount of LMI participants within the Horry County Buyout program than initially expected. The total, combined budget for the Horry County Buyout program remains the same.

### Activity Description:

The City of Bennettsville seeks to address the repetitive flooding within its Shady Rest and Richardson Park neighborhoods, which sit within a floodplain, through a buyout program that will allow the residents to relocate to a safer area. The buyout program has identified 51 possible properties across the two neighborhoods. Once the properties have been purchased, the properties' structures will be demolished and the land will be returned to undeveloped open space. This focused project is located in Marlboro county, a South Carolina-identified Most Impacted and Distressed County. The State will administer the project and has awarded it \$4,933,255. This DRGR activity will focus solely on the Low to Moderate Income aspect of the project.

### Location Description:

**Activity Progress Narrative:**

The State is working on eligibility determination for participating homeowners and has identified potential properties for the program. It is working on altering the project tiered review, per HUD guidance. Additionally, a new buyout incentive was recently approved. Next quarter, the State anticipates completing Environmentals and starting appraisals. This activity will focus on the Low to Moderate Income applicants within this Buyout program.

### Activity Description:

This activity will focus on the Low to Moderate Income (LMI) component of the Dillon County Buyout project. The project will be administered by the State and has received a total grant award \$2,210,000. This specific DRGR Activity's budget represents all LMI related expenditures in connection to the Dillon County Buyout Program. Dillon County can be classified as either a State or a HUD-identified Most Impacted and Distressed County due to the two separate grants. Expenditures are classified as State or HUD-Most Impacted and

Distressed depending on if they come out of the B-18-DP-45-0001 or B-19-DT-45-0001 grant allocations.

The State will administer and fund the buyout of six residential structures located within the boundaries of the special flood hazard area near the Little Pee Dee River. The properties previously received substantial damage from the impacts of Hurricane Florence and Hurricane Matthew and remain at risk of flooding from future storm events. The buildings will be acquired and demolished, with the land transformed into open space that will be allowed to revert back to its natural state. At no time will the State own the property. Rather, the property will be held by Dillon County or another local entity. The land will also have a covenant emplaced on the deed that will ban future commercial and residential development. Participation in the program is 100% voluntary.

Previously, this project used to be covered under a matching activity that planned to participate in FEMA's HMGP program. More information can be found in the General Federal Matching Activity. As part of the transition within DRGR, the Dillon County Buyout FEMA HMGP Match activity was edited and renamed as the Dillon County Buyout LMI activity, which now falls under the State's Buyout category. All funds and expenditures from the original project scope were transferred as well. A separate activity was created to track Urgent Need expenditures.

### **Location Description:**

Dillon County, SC

### **Activity Progress Narrative:**

The Dillon County Buyout Program recategorization from a Federal Funds Match activity to a Buyout Activity was approved by the Steering Committee in November. While the scope of the project largely remains the same, it will now be fully funded by CDBG MIT dollars. Within DRGR, the Dillon County Buyout Match activity was edited and recategorized as the Dillon County Buyout LMI activity. A separate activity was created to focus on Urgent Need applicants.

This specific DRGR activity had two major budget changes this quarter. First, as part of the approved recategorization, was the budget increase to cover the whole scope of the project instead of just a local match. Second, was the removal a 2.5 percent buffer based on the original award amount that was originally in place to tackle project budget overruns. This change occurred prior to its recategorization as a non-match buyout activity. Due to how the State has set up its award phases and change order system, it no longer needs the buffer to be in place within the DRGR budget. Rather, handling inevitable project overruns is carefully considered during each phase's award period and the phases are spread out to avoid obligating too much of the grant within close proximity. This change resulted in the removal of the 2.5% buffer based on the original match award amount of \$11,086.63.

### Activity Description:

This activity will focus on the Low to Moderate Income (LMI) component of the Darlington County Buyout project. The project will be administered by the State and has received a total grant award \$8,643,667. This specific DRGR Activity's budget represents all LMI related expenditures in connection to the Darlington County Buyout Program. It is located in a State-identified Most Impacted and Distressed County.

The State has deemed 40 parcels, split between areas in Hartsville and near the City of Darlington, as eligible to participate in the 100 percent voluntary buyout program of homes impacted by flooding. A significant number of these homes are located within flood zones. Once the identified properties have been purchased, they will undergo demolition and have a permanent deed restriction or covenant that will maintain the properties as either open and public greenspace, wetlands, or other beneficial floodplain restorations. These deed restrictions and covenants will last in perpetuity, with restrictions imposed on the use of land. The State will facilitate the transfer of property from the eligible property owners to Darlington County but will at no time hold possession of the property.

### Location Description:

Darlington County, South Carolina

### **Activity Progress Narrative:**

The Darlington County Buyout Program was recently approved by the Steering Committee in November. The State has mailed letters to interested homeowners and hopes to begin intake and eligibility review next quarter. This activity will focus on the Low to Moderate Income applicants within this Buyout program.

#### Activity Description:

This Activity will cover all program planning actions for the Mitigation Grant and its activities. Planning funds will also be used to pay for Hazard or Flood plans produced for both the State and its units of general local government (UGLG)s. Additionally, in preparation for the Mitigation Grant, the State contracted with AECOM to

produce a watershed study of the Pee Dee and Santee regions, which received the most flood damage from our previous storms. This watershed study will be used to help guide future decisions concerning buyout and infrastructure projects. The Plans and Studies that have received awards from the State are listed below:

#### South Carolina Emergency Management Division's Hazard Identification and Risk Assessment

The Statewide Hazard Identification and Risk Assessment (HIRA) seeks to collect data and analyze it to better understand the impacts of disaster events within the State. This assessment will help inform goals and objectives that will guide state agencies in determining mitigation actions and prioritizing projects that most effectively reduce harm to life and property. Conducting the HIRA is a requirement to completing the State Hazard Mitigation Plan Update, which must be up to date in order to participate in FEMA Hazard Mitigation programs. The South Carolina Emergency Management Division (SCEMD) has been awarded \$109,030 in CDBG-MIT funds. In total, SCEMD expects to spend \$400,000 to complete the HIRA.

#### Marion County Stormwater Master Plan

In March 2021, Marion County's Stormwater Master Plan was awarded \$500,000.00 by the State. Marion County has dealt with significant flooding caused by storms and the confluences of the Great Pee Dee, Little Pee Dee, and Lumber Rivers. The plan seeks to identify flooding issues throughout the county, assess the stormwater system within the county, and eventually use this information to identify and develop mitigation infrastructure projects that can alleviate flooding. Following the completion of the Stormwater Master Plan, Marion will use the information and data acquired to prepare for future infrastructure projects. The creation of the plan will be administered by the State. Marion County is a HUD-identified Most Impacted and Distressed County.

#### Town of Pamplico Stormwater Study

The State awarded \$500,000 to the Town of Pamplico's Stormwater Study. The activity will be administered by the State, who will utilize contractors to analyze data and create stormwater models. The project will involve collecting GIS and Survey data to create hydrologic and hydraulic models of 2, 10, 50, and 100 year 24 hour storm events. Currently, old and inadequately sized stormwater structures allow for runoff to stand in roadways and surrounding properties during storms with heavy precipitation. The findings of the study will be used to identify infrastructure projects that can address this problem. The town of Pamplico is located in Florence County, a HUD Identified MID County.

#### Town of Mayesville Stormwater Study

The Town of Mayesville was awarded \$105,000 for its Stormwater Study. This activity will be administered by the State, who will utilize contractors to create a hydrology study to understand the movement and distribution of stormwater within the incorporated area of Mayesville. The Town of Mayesville is located between year flood zones and faces inadequate drainage during major storms, which cause flood damage to town facilities and private property, as well as creating hazardous conditions for its residents. This study will later be used to identify future flood mitigation projects. The town of Mayesville is located in Sumter County, a HUD Identified MID County.

#### City of Conway Stormwater Master Plan

The City of Conway was awarded \$305,000 for its Stormwater Master Plan. This activity will be administered by the City Subrecipient. The City will contract with an engineering firm to inventory and survey the existing storm drainage system, delineate watersheds, create hydraulic modeling of 2 through 100 year 24 hour storm events, and create a final report that will highlight problem areas and include recommendations for improving the stormwater system. The City of Conway is located in Horry County, a HUD Identified MID County.

#### City of Florence Stormwater Master Plan

The City of Florence was awarded \$500,000 for its Stormwater Master Plan project. This plan will replace the City's outdated 1974 Stormwater master plan, which is based on outdated development trends, technologies, and stormwater mitigation strategies of the time. Additionally, the city has developed significantly since the 1974 plan and is need of an up to date Stormwater Master Plan. Within recent years, Hurricanes and major storms have caused flooded roadways, impeded emergency response, and caused public and private property damage. The Stormwater Master Plan will be used to inform the City of future projects that could mitigate their current flooding issues. The City of Florence will administer this activity as a subrecipient. The City of Florence is located in Florence County, a HUD Identified MID County.

#### Darlington County Watershed Study

Darlington County's Watershed Study seeks to analyze local flooding from stormwater, local stream and creeks, and ground inundation, as well as identify and develop mitigation plans and projects. The study will encompass the county and impact approximately 66,618 residents. While local groups have attempted to complete watershed studies in smaller communities, a county-wide study led by local government has not been conducted. The State will administer this Watershed Study and has assigned it a budget of \$300,000. The LMI percentage for the area is 41.43%. Darlington is a State-identified MID county.

#### The City of Orangeburg's Stormwater Drainage Study

The City of Orangeburg seeks to conduct a Stormwater Drainage Study that will determine future improvement projects within LMI areas of the city. Previously, these areas have suffered from frequent and repetitive damages to their homes and properties from stormwater. The study will focus exclusively on the LMI areas which include crucial roadways around Magnolia Street and John C. Calhoun Boulevard, and the Railroad Corner. The study will beneficially impact around 12,861 people. The Study will be conducted by the State and is assigned a budget of \$300,000. The LMI percentage of the study's area is 54%. The City of Orangeburg is

located in a State-identified MID county.

#### The Town of Summerton's Hydraulic and Hydrology Study

The Town of Summerton's seeks to conduct a hydraulic and hydrology study to better understand the movement and distribution of stormwater within the incorporated area of the town and to identify future mitigation projects that can address possible flood and storm damage. The LMI percentage of the study is 69%. The Study's budget is set at \$150,000 and will be administered by the State. Summerton is located in Clarendon, a HUD-identified MID county.

#### The Citadel's Multi-Hazard Mitigation Plan Update

The Citadel is a Military College located in Charleston, SC. It is seeking to update its Multi-Hazard Mitigation Plan which was originally written and adopted in 2017. In order to maintain its Disaster Resistance University Status and remain eligible for future disaster relief funding, the Multi-Hazard Mitigation Plan must be updated every five years. The Plan is expected to cost \$44,000. The Citadel will contribute \$11,000 to the project, with the State providing \$33,000. The location of the study is in Charleston, a HUD-identified MID county.

#### The Georgetown and Williamsburg Counties Hydrologic and Hydraulic Study

The Georgetown and Williamsburg Counties Hydrologic and Hydraulic study seeks to assess the existing drainage conditions and identify improvements throughout both counties. Specifically, this study will assess the existing drainage systems, develop, assess, and prioritize projects, and establish an implementation strategy for such projects that will improve the drainage system and mitigate against future flooding throughout Georgetown and Williamsburg Counties. The State will administer this study and has awarded the project \$900,750. The area covered by this study is located in HUD-identified Most Impacted and Distressed Counties.

#### Georgetown County Comprehensive Plan

The Georgetown County Comprehensive Plan with Resilience Element seeks to address how the county responds and reacts towards hazardous situations and/or events. The resilience element will focus on the main natural threats the county faces, such as hurricanes, king tides, severe thunderstorms, land subsidence, erosion, salt water intrusion, and more. The project will help inform the county and its citizens on ways to help mitigate future threats. This plan will be administered by the subrecipient and was awarded \$30,000 by the State. The area covered by this plan is located in a HUD-identified Most Impacted and Distressed County.

#### Horry County Buck Creek and Simpson Creek Watersheds Hydrologic and Hydraulic Study

Horry County's Buck Creek and Simpson Creek Watersheds Hydrologic and Hydraulic Study will focus on one of the three main focus areas from Horry County's Flood Resilience Master Plan. It seeks to identify potential projects that will improve the drainage system and reduce potential flood impacts throughout the Buck Creek and Simpson Creek Watersheds. The study will identify and prioritize a list of projects that include traditional infrastructure projects and natural stormwater solutions that could include projects that remove existing structures from the landscape and reclaim natural areas. This study will be administered by the Subrecipient and has been awarded \$750,000 by the State. The area covered by the study is located in a HUD-identified Most Impacted and Distressed County.

#### Orangeburg County Hydrologic and Hydraulic Study

Orangeburg County's Hydrologic and Hydraulic Study seeks to examine flooding issues and identify projects that can reduce future damage. The study will assess existing drainage systems; develop, assess, and prioritize projects; and establish an implementation strategy for such projects that will improve the drainage system and mitigate against future flooding throughout Orangeburg County. This study will be run by the State and has been awarded \$450,000. The area covered by the study is located in a South Carolina-identified Most Impacted and Distressed County.

#### Town of James Island Creek Basin Drainage Master Plan

The Town of James Island is seeking to create a Hydrologic and Hydraulic Study that will aid in the creation of a Drainage Master Plan. The study will focus on the James Island Creek Basin, which was identified as a priority in a previous study. The result of this plan will be the development of a stormwater management plan for that basin that can be used to inform future programs and projects. The State has awarded the project \$150,000 and will administer the study. The Town of James Island is located in Charleston County, a HUD identified Most Impacted and Distressed County.

#### Chesterfield County Hydrologic and Hydraulic Study

Chesterfield County seeks to create a Hydrologic and Hydraulic Study to assess existing drainage conditions across the county, with a specific focus on the towns of Chesterfield and Patrick. Additionally, it will be used to develop, assess, and prioritize potential projects and establish an implementation strategy that will improve drainage and mitigate against future flooding. This study will be run by the State and has been awarded \$500,000. Chesterfield is a South Carolina identified Most Impacted and Distressed County.

#### Calhoun County Hydrologic and Hydraulic Study

Calhoun County seeks to create a Hydrologic and Hydraulic Study to address inadequate road drainage and flooding throughout the county. The county has identified two focus areas, the Town of Cameron and the unincorporated community of Sandy Run. The State has awarded this study \$350,000 and will administer the

study. Calhoun is a South Carolina identified Most Impacted and Distressed County.

#### Town of Lamar Stormwater Master Plan

This project will cover the Town of Lamar's Stormwater Master Plan, which seeks to address decades of severe flooding. The plan will identify and quantify existing flood conditions throughout the town and recommend mitigation solutions and projects that would minimize or eliminate flooding.

This project will occur in a South Carolina-identified Most Impacted and Distressed County. The State awarded the project \$145,200.00 and will administer the study.

#### Town of Society Hill Stormwater Master Plan

This project will cover the Town of Society Hill Stormwater Master Plan, which seeks to address decades of severe flooding. The plan will identify and quantify existing flood conditions throughout the town and assist the town in identifying and quantifying storm water projects that will minimize or eliminate flooding within the town.

This project will occur in a South Carolina-identified Most Impacted and Distressed County. The State awarded the project \$138,800.00 and will administer the study.

In addition, Community Outreach and Input will be addressed within this activity. In preparation for the grant, the State held 4 public hearings in the Mitigation Grant counties in order to receive public input. The State also strives to meet monthly for its Stakeholder meetings in order to inform its government agency partners, assisting volunteer organizations, and the general public about the CDBG-DR and CDBG-MIT programs run by the State.

### Location Description:

The Mitigation Grant will serve counties selected by HUD and the State that received significant damage from recent storms. HUD Most Impacted and Distressed (HUD MID): Charleston, Clarendon, Dorchester, Florence Georgetown, Horry, Marion, Sumter, Dillon, and Williamsburg  
South Carolina Most Impacted and Distressed (SC MID): Berkeley, Calhoun, Chesterfield, Darlington, Lee, Marlboro, and Orangeburg.

### Activity Progress Narrative:

This quarter, the State awarded 1 new Plans and Studies project in December. More information about the Santee Lynch COG Hazard Mitigation Plan Update will be updated in the Activity description next quarter. Around \$6.4 million has been awarded to 21 projects for State Agencies and UGLs across South Carolina for Plans and Studies, which is approximately 46 percent of the assigned budget for this activity.

The Citadel's Hazard Mitigation Plan Update's engineering firm has completed the Hazard Identification and Risk Assessment draft and is awaiting comments and revisions from the Hazard Mitigation Planning Committee. This draft update will include hazard identification and review of existing hazards, hazard profiles, asset inventory, and priority risk indices. Next quarter, the firm will be scheduling the third Hazard Mitigation Planning Committee Meeting to review Capability Assessment, Plan goals and objectives, and review mitigation actions.

The Town of Summerton's Hydrology Study, while still within its period of performance, has ran into some delays. The Alternatives Analysis Report had a late December deadline but has not yet been submitted. The State's Program Coordinator is working with the firm to figure out a new deadline. Nonetheless, the Hydrology study is moving forward, having completed its project administration, meetings, data gathering, field survey, and Existing Conditions Report phases. Next Quarter, the State anticipates the project entering the beginning of its closeout phase.

Darlington County's Watershed Study has completed its data gathering, initial public and stakeholder meetings, field survey, and Existing Conditions Report. The State anticipates the study coming to a close soon, as the Alternatives Analysis Report and Briefing, Project Recommendations and LMI Assessment, and Final Report and Briefing are currently being work on.

The Town of Pamplico's Stormwater Study is in the middle of its closeout phase and has completed all work related to the study. It anticipates closing the project in the near future.

The City of Florence Stormwater Masterplan remains on schedule. City staff has documented all of the known areas of known flooding and provided them to their consultant. Engineering consulted has reviewed all historical data, including the 1970s stormwater report, work orders, and etc to compile the draft of the first phase of the masterplan. City staff is currently reviewing the draft prior to submitting it to the State. As of this quarter, they have done a historical review, Hydraulic and Hydrologic Modeling, drafted the first phase of the Masterplan, and developed an interactive website and informational video. Next quarter, they hope to finalize their review of the first phase draft and send it to the State, proceed with the second portion of the masterplan, and hold public meetings within 3 districts of the City of Florence.

The Georgetown and Williamsburg Hydrologic and Hydraulic study is in the Stakeholder and Public Meetings phase. Two stakeholder meetings were conducted on January 5th, with the first in Williamsburg and the second in Georgetown. Six additional meetings will occur throughout the two counties in January as well. Currently, the selected firm is working on its project administration and meetings, stakeholder engagement, and public engagement and public meetings tasks. Next quarter, the firm anticipates wrapping up on the public and stakeholder meeting phase, completing the identification of focus areas, and beginning work towards the Existing Conditions Report.

The Georgetown Comprehensive Plan is currently undergoing its Request for Qualifications process. The County signed the subrecipient agreement earlier this quarter.

The City of Conway Stormwater Master Plan's contractor has provided a draft final report, exhibits, and cost estimates during this quarter. Next quarter, the contracted firm will summarize the results and make final recommendations along with the environmental review. Most of the remaining work consists of hydraulic modeling and BCA preparation. The final recommendations will include a detailed BCA that will be used in ranking future projects. The contractor anticipates delivering the final report to the city next quarter.

The Horry County Buck Creek and Simpson Creek Watersheds Hydraulic and Hydrologic study is still within the procurement negotiation phase. Horry County has been communicating with the State about the project's funding.

The Marion County Stormwater Master Plan has completed all milestones and is in the middle of closeout.

The City of Orangeburg Hydrology Study's contracted firm has received an extension till January 2023. Currently, the firm has completed the Project Administration and Meetings, Existing Conditions Report, Alternatives Analysis Report, and Project Recommendations and LMI Assessment phases. It is working on its final milestone, the Final Report. Next Quarter, the Study is expected to enter project closeout.

The Orangeburg County Hydrology Study has completed its initial kick off, stakeholder, and public meetings, as well as data gathering. The contracted firm is working on its Existing Conditions Report and Alternatives Analysis Report tasks. Because of milestone delays, the firm has been tasked to either provide a plan to expedite the remainder of the study or submit a project extension request.

The Town of Mayesville Stormwater Study has completed its Data gathering, initial meetings, Existing Conditions Report, and Alternatives Analysis Report milestones. While the project is slightly behind schedule, the contractor anticipates delivering its Project Recommendations and LMI Assessments in early January. The project is expected to complete its remaining tasks and begin closeout next quarter.

The South Carolina Emergency Management HIRA is proceeding on schedule and is wrapping up any loose ends with the hazard analysis.

The Town of James Island Creek Basin Drainage Master Plan is in the negotiation phase with the selected firm about an appropriate scope of work and project cost. The State anticipates that the contract will be executed and kick off will begin next quarter.

The Chesterfield County Hydrologic and Hydraulic Study project is hosting 4 public meetings in January and has already held the kickoff and stakeholder meetings. The contractor is currently sending out mailers about the project and is in the middle of its Data Gathering phase. Next quarter, they anticipate completing its first milestone and beginning Site Assessments.

The Calhoun County Hydrologic and Hydraulic Study underwent its Request for Qualifications and procurement phase this quarter. The State and its selected firm are working through project scope and negotiations. Next quarter, it anticipates executing the contract with the selected firm and kicking off the project.

The Town of Lamar Stormwater Masterplan is in the middle of its procurement phase. Short list interviews are expected to occur in January. Next quarter, the State anticipates selecting a firm, holding contract negotiations, and executing the project contract, as well as project kickoff occurring.

Town of Society Hill Stormwater Masterplan is in the middle of its procurement phase. Short list interviews are expected to occur in January. Next quarter, the State anticipates selecting a firm, holding contract negotiations, and executing the project contract, as well as project kickoff occurring.

Town of Pinewood Hydrologic and Hydraulic study is in the middle of its procurement phase. Short list interviews are expected to occur in January. Next quarter, the State anticipates selecting a firm, holding contract negotiations, and executing the project contract, as well as project kickoff occurring.

Santee-Lynches COG Hazard Mitigation Plan Update was awarded \$80,650 by the Mitigation Special Case Panel in December. The Santee Lynches Council of Governments is one of ten regional, sub-state districts within South Carolina and is comprised of Clarendon, Kershaw, Lee, and Sumter counties. This project will focus on updating their FEMA approved Hazard Mitigation Plan, which is currently out of date and risks creating further community vulnerability from Natural Hazard Events.

The State will continue to receive, review, and approve Plans and Studies project applications on a year-round basis.

The State is hosting its monthly stakeholder meetings online through Zoom.

Adjustments were made to the Responsible Organization Expenditures to reflect the earlier transfer of responsibilities from the South Carolina Department of Administration to the South Carolina Office of Resilience. This does not change the total amount of expenditures, which remains equal to the amount of draw downs.

<b>Most Impacted and Distressed Expended</b>	\$0.00	\$0.00
B-18-DP-45-0001	\$0.00	\$0.00
B-19-DT-45-0001	\$0.00	\$0.00

### Activity Description:

This activity will cover the usage of CDBG-MIT funds to help units of general local government (UGLG)s meet their cost-sharing requirements for federal matching programs, such as FEMA's Hazard Mitigation Grant Program (HMGP), Building Resilient Infrastructure and Communities (BRIC), and Flood Mitigation Assistance (FMA). Different funding rules apply for each program, but FEMA's programs currently match up to a 75% Federal and 25% Local cost sharing basis.

The South Carolina Office of Resilience (SCOR) will work in conjunction with the Emergency Management Division (SCEMD), which manages the HMGP and BRIC programs within South Carolina, and the Department of Natural Resources (SCDNR), which manages the FMA program within South Carolina, to increase UGLG access to funds for federal matching programs.

2022 Note: As part of Amendment 2 to the paper Action Plan, all unallocated budget funds for Matching activities were transferred over to Mitigation Buyout activities.

Additionally, the Dillon County Buyout FEMA HMGP Match Activity was recategorized as a Housing Buyout Activity. More information can be found in the Dillon County Buyout activities. Within DRGR, the Dillon County Buyout FEMA HMGP Match Activity will be edited and recategorized as the Dillon County Buyout LMI Activity instead of undergoing deletion. This is done to ensure relevant costs transfer over. A separate Dillon County Buyout UN Activity will be created as well.

### Location Description:

The Mitigation Grant will serve counties selected by HUD and the State that received significant damage from recent storms. HUD Most Impacted and Distressed (HUD MID): Charleston, Clarendon, Dorchester, Florence Georgetown, Horry, Marion, Sumter, Dillon, and Williamsburg  
South Carolina Most Impacted and Distressed (SC MID): Berkeley, Calhoun, Chesterfield, Darlington, Lee, Marlboro, and Orangeburg.

### Activity Progress Narrative:

As of December 31st, the State has approved 10 Federal Matching projects for around \$2.6 million and has awarded 100 percent of its funds according to Amendment 2 of the Migration Action Plan. The State is no longer accepting applications for Federal Funds Matching under the CDBG MIT grant. These funds will assist UGLGs and the State fund their portion of the Local/Federal match of the Hazard Mitigation Grant Program (HMGP), Pre-Disaster Mitigation (PDM), Economic Development Administration (EDA), and other Federal grant programs. Additionally, the Dillon County Buyout HMGP Match activity was transferred from the Federal Funds Matching pillar to the Housing Buyouts pillar during this quarter. More information can be found in the updated activity.

This specific activity's budget has been decreased to zero dollars to reflect having fully assigned 100 percent of the Federal Funds Matching budget as dictated in Amendment 2.

**Activity Description:**

Marion County seeks to reduce flood damage by future storms through elevating residential structures above the Base Flood Elevation. The project is being funded by FEMA's HMGP, which utilizes a 75% Federal and 25% Local cost share to assist local governments. The State has awarded this project \$542,172.50, which will cover the Local match portion of the HMGP grant. This Urgent Need matching project will be administered by the subrecipient and will occur within a HUD-identified Most Impacted and Distressed County.

**Location Description:**

### Activity Progress Narrative:

The State approved this Federal Matching project in 2022. The project is in the procurement phase and has sent out a bid for contracting a firm to manage the project and assist with the additional Request for Qualifications process in regards to the actual elevation work.

The budget in DRGR was edited to remove a 2.5 percent buffer that was originally in place to tackle project budget overruns. Due to how the State has set up its award phases and change order system, it no longer needs the buffer to be in place within the DRGR budget. Rather, handling inevitable project overruns is considered during each phase's award period and the phases are spread out to avoid obligating too much of the grant within close proximity. The award for this project continues to remain the same. Only the 2.5% buffer of \$13,554.31 was removed.

**Activity Description:**

This activity will cover the Federal Funds Match for Georgetown County Andrews Local Flood Reduction Study. Phase I of the study was completed in November 2020, which consisted of a feasibility study, Hydraulic and Hydrologic model, and design drawings. Phase II will include demolition of existing stormwater infrastructure when applicable and the construction of an improved storm drainage system, which will involve adding new pipe, installing new drainage ditches, manholes, and inlets. Additionally Phase II will include installing

sidewalks, improving existing drainage ditches, and repairing roads. The total cost for the project will be \$4,885,368, with the FEMA HMGP Federal cost share consisting of \$3,664,026. The Local cost share for this project is \$1,221,342. The State will contribute \$1,136,865, with Georgetown being responsible for the remaining cost share.

Georgetown is a HUD identified Most Impacted and Distressed County. Over 50% of the project area's population consists of Low to Moderate income households. The activity will be administered by the subrecipient.

### **Location Description:**

### **Activity Progress Narrative:**

Georgetown County Andrews Local Flood Reduction Study Phase II Match was approved by the Mitigation Special Case Panel in June 2022 and is currently in the middle of the procurement process. The construction bid has been posted, as well as a reposting of the materials bid.

The budget in DRGR was edited to remove a 2.5 percent buffer that was originally in place to tackle project budget overruns. Due to how the State has set up its award phases and change order system, it no longer needs the buffer to be in place within the DRGR budget. Rather, handling inevitable project overruns is carefully considered during each phase's award period and the phases are spread out to avoid obligating too much of the grant within close proximity. The award for this project continues to remain the same. Only the 2.5% buffer of \$28,421.63 was removed.

**Activity Description:**

This activity will cover the Federal Funds Match for the City of Bennettsville Crooked Creek Stormwater Study. The Study will consist of inventorying and surveying the existing stormwater drainage system, delineating watersheds, hydraulic modeling, and the creation of a Final Report and Stormwater Master Plan. The project's area consists of more than 50% Low to Moderate Income households. The State has awarded the project \$56,250, which will count as the project's Local Match. The total cost of the Study will be \$225,000, with \$168,750 of that amount being covered by the Federal cost share.

Bennettsville is located in Marlboro County, a South Carolina Identified Most Impacted and Distressed County. The activity will be administered by the subrecipient.

### **Location Description:**

### **Activity Progress Narrative:**

The City of Bennettsville Crooked Creek Stormwater Study Match was approved by the Mitigation Special Case Panel in June 2022. The project has finished reviewing firm qualifications and is scheduling interviews.

The budget in DRGR was edited to remove a 2.5 percent buffer that was originally in place to tackle project budget overruns. Due to how the State has set up its award phases and change order system, it no longer needs the buffer to be in place within the DRGR budget. ### Activity Description:

This activity will cover the Phase 1 match for Mt Pleasant's Hobcaw Basin project. Phase 1 will consist of Hydraulic and Hydrologic modeling, a design survey, final design, permitting, and development of construction plans. Phase 1 has been approved for an HMGP grant and the State will cover the local cost share amount of \$180,278.66. The Hobcaw Basin project will be administered by the subrecipient. This project will occur in a HUD-identified Most Impacted and Distressed County.

### Location Description:

### Activity Progress Narrative:

The Mount Pleasant Hobcaw Basin matching project was approved by the Mitigation Special Case Panel in August and was awarded \$180,278.66. The project is participating in the FEMA HMGP match program. It is approximately 20 percent complete with the surveys of the six drainage basins, project topography, infrastructure, and roadways completed.

**Activity Description:**

This activity will cover the Town of Cheraw’s FEMA Hazard Mitigation Grant Program Match. The Town of Cheraw seeks to create a Stormwater Master plan that will identify existing flooding hazards and recommend hazard mitigation strategies. The plan update will include data gathering, field investigation, modeling and flood hazard assessment, and flood hazard mitigation planning. The project has a total budget of \$263,450, with a federal cost-share of \$197,587.50 and a local cost-share of \$65,862.50.

The State will run the activity and assist the Town of Cheraw by providing the local cost-share of \$65,862.50. The activity is based within Chesterfield county, which is classified as a South Carolina-identified Most Impacted and Distressed county.

### **Location Description:**

Cheraw, SC

### **Activity Progress Narrative:**

The Plan has been completed and submitted to the Town of Cheraw. The State is waiting on FEMA for project closeout and reimbursement.

The budget in DRGR was edited to remove a 2.5 percent buffer that was originally in place to tackle project budget overruns. Due to how the State has set up its award phases and change order system, it no longer needs the buffer to be in place within the DRGR budget. Rather, handling inevitable project overruns is carefully considered during each phase's award period and the phases are spread out to avoid obligating too much of the grant within close proximity. The award for this project continues to remain the same. Only the 2.5% buffer of \$1,595.31 was removed.

B-18-DP-45-0001	\$0.00	\$0.00
B-19-DT-45-0001	\$0.00	\$0.00

**Activity Description:**

This activity will cover the City of Dillon's FEMA Hazard Mitigation Grant Program Match. The City of Dillon seeks to create a Stormwater Management Plan focused solely on the city. This plan will become an annex to the preexisting Hazard Mitigation Plan for Dillon County. The current Hazard Mitigation Plan does not go into depth about specific flooding mitigation for the City. The total project will be \$240,000, with the Federal cost-share being \$180,000 and the Local cost-share being \$60,000. The State will provide the \$60,000 for the local cost-share and conduct the study.

This activity will be administered by the State. As allowed by Public Law for 2018 Disasters, the State is able to expand the Most Impacted and Distressed (MID) category from the Zip Code level to the rest of the County it resides in. This means that Dillon is now a HUD-identified MID County.

**Location Description:**

Dillon, SC

**Activity Progress Narrative:**

The City of Dillon Stormwater Management Plan has been completed. Information obtained from the Plan has led to \$3,800,000 in Mitigation projects being awarded. The State is still awaiting FEMA to closeout the project on their end.

The budget in DRGR was edited to remove a 2.5 percent buffer that was originally in place to tackle project budget overruns. Due to how the State has set up its award phases and change order system, it no longer needs the buffer to be in place within the DRGR budget. Rather, handling inevitable project overruns is carefully considered during each phase's award period and the phases are spread out to avoid obligating too much of the grant within close proximity. The award for this project continues to remain the same. Only the 2.5% buffer of \$1,500.00 was removed.

**Activity Description:**

This activity will focus on Dillon County's FEMA Hazard Mitigation Grant Program Match. Dillon County seeks to create a flood management study to determine the best course of action to mitigate and alleviate water damage amongst its communities. The county is also requesting that the study become the Flood Management Annex to the Dillon County Hazard Mitigation Plan. The project has a total budget of \$100,000, with the Federal cost-share at \$75,000 and the local cost-share at \$25,000. The State will provide the \$25,000 local cost-share and will conduct the study. Also, as allowed by Public Law for the 2018 Disasters, the State is able to expand the Most Impacted and Distressed (MID) category from the Zip Code level to the rest of the County it resides in. Because of this, Dillon county is now classified as a HUD-identified MID county.

## Location Description:

Dillon County

## Activity Progress Narrative:

The Dillon County Stormwater Study is currently in progress, with Facility Inventory and Mapping and the Implementation Plan being completed. The Master Plan is currently in development.

The budget in DRGR was edited to remove a 2.5 percent buffer that was originally in place to tackle project budget overruns. Due to how the State has set up its award phases and change order system, it no longer needs the buffer to be in place within the DRGR budget. Rather, handling inevitable project overruns is carefully considered during each phase's award period and the phases are spread out to avoid obligating too much of the grant within close proximity. The award for this project continues to remain the same. Only the 2.5% buffer of \$625.00 was removed.

B-19-DT-45-0001	\$0.00	\$0.00

**Activity Description:**

This activity will focus on the Federal Funding Match for South Carolina Emergency Management Division's (SCEMD) Hazard Mitigation Plan. This plan will also receive funding from FEMA's Pre-Disaster Mitigation (PDM) Program, which utilizes a Local-Federal cost-sharing strategy to assist local and state governments fund mitigation projects. The State has awarded SCEMD with \$30,750.00 in CDBG-MIT funds, which will go towards

the 25% Local portion of the cost-share. Combined with PDM's Federal cost-share, the State Hazard Mitigation Plan Update is budgeted at \$123,000.

SCEMD plans to utilize these funds to update the State Hazard Mitigation Plan to reflect new and updated data and information since the previous five-year plan approved in 2018. State Hazard Mitigation Plans are valid for five years and the current one will expire by 2023. SCEMD will complete the plan, go through the approval process, and adopt it no later than October 1st, 2023.

### **Location Description:**

The State of South Carolina

### **Activity Progress Narrative:**

The Hazard Mitigation Plan revision is in its final stages of revisions and is ensuring that input from different agencies and reviewers are included. It is still on schedule. Next Quarter, they anticipate reviewing standard plan guidance and submitting the plan to FEMA.

The budget in DRGR was edited to remove a 2.5 percent buffer that was originally in place to tackle project budget overruns. Due to how the State has set up its award phases and change order system, it no longer needs the buffer to be in place within the DRGR budget. Rather, handling inevitable project overruns is carefully considered during each phase's award period and the phases are spread out to avoid obligating too much of the grant within close proximity. The award for this project continues to remain the same. Only the 2.5% buffer of \$768.75 was removed.

B-19-DT-45-0001	\$0.00	\$0.00

**Activity Description:**

Francis Marion has been awarded grants by the Economic Development Administration and the State to replace and upsize the stormwater infrastructure around its campus in six areas. This action was recommended after analysis by AECOM determined that non-action would result in adverse environmental conditions and that maintenance on the current infrastructure would not result in sufficient stormwater management. The original total project cost is estimated to be \$874,279, with 80% of the Federal Cost Share being \$699,279 and the remaining 20% of the non-Federal Cost Share being \$175,000. The State will provide the non-Federal Cost Share match. The project will occur at Francis Marion University in Florence County, a HUD-identified Most

Impacted and Distressed County. The project will be administered by the Subrecipient.

2022 UPDATE:

Francis Marion University's received additional EDA funds and has increased the scope of the project. The new total project costs is now \$1,942,497.00, with the Federal Cost Share being \$1,499,279.00. The State is now contributing \$443,218.00 to the project's Local Cost Share.

### **Location Description:**

### **Activity Progress Narrative:**

Bid documents for the project were approved by the EDA in late October, with the advertisement of bids beginning on October 31st, which can be found on the SCBO website and the facilities management page of the Francis Marion University website. Three sealed bids were received. The preconstruction conference was scheduled for January 13th. Francis Marion received additional funds from the EDA to increase the scope of their project. After review and approval, the State decided to increase their contribution to the local match as well. Additionally, the Responsible Organization Expenditures were edited to better reflect who the exact subrecipient is. This resulted in no changes to the total expenditure amount.

Two major budget changes occurred during this quarter. The first was the change order to increase the CDBG-MIT award amount from \$175,000 to \$443,218.00. The second was to remove a 2.5 percent buffer built into the prior budgeted amount within the DRGR activity budget that was originally in place to tackle project budget overruns. Due to how the State has set up its award phases and change order system, it no longer needs the buffer to be in place within the DRGR budget. Rather, handling inevitable project overruns is carefully considered during each phase's award period and the phases are spread out to avoid obligating too much of the grant within close proximity. The award for this project continues to remain the same. Only the 2.5% buffer of \$4,375.00 based on the original award amount was removed.

**Activity Description:**

South Carolina's Department of Natural Resources (SCDNR) was awarded \$140,710.75 by the State as part of the 75% Federal and 25% Local cost share Hazard Mitigation Grant Program (HMGP). The total project cost is \$562,843. SCDNR will use the funds of these grants to develop HEC-RAS 2-dimensional models based on HUC 8 watersheds. These models will be able to provide real-time inundation mapping based on the flood event. This project will be run by SCDNR.

**Location Description:**

### Activity Progress Narrative:

SCDNR is currently in the Request for Qualifications phase of the project. Interested firms were interviewed, with contract negotiation currently underway with the selected firm. The contract will include work outside of this specific project. Additionally, the Responsible Organization Expenditures were edited to better reflect who the exact subrecipient is. This resulted in no changes to the total expenditure amount.

The budget in DRGR was edited to remove a 2.5 percent buffer that was originally in place to tackle project budget overruns. Due to how the State has set up its award phases and change order system, it no longer needs the buffer to be in place within the DRGR budget. Rather, handling inevitable project overruns is carefully considered during each phase's award period and the phases are spread out to avoid obligating too much of the grant within close proximity. The award for this project continues to remain the same. Only the 2.5% buffer of \$3,517.77 was removed.

#### Activity Description:

In order to increase storm and flood defenses, the State will provide funds for infrastructure projects to units of general local government (UGLG). In order to receive funding, UGLGs must apply with a detailed plan of what their projects and must receive the State's approval of their project. All projects must undergo a Benefit Cost Analysis (BCA) and must meet the requirement scores. An exception to this may be made for projects that provide noteworthy benefits to the LMI community that aren't easily captured by the BCA. The goal of these infrastructure projects is to better protect local communities from preventable flood damage. These projects will be overseen by the State, but administered by UGLGs.

This specific activity will focus on the application process of the UGLG projects and track their progression. All infrastructure funds will be held in this activity until they are allocated to a specific infrastructure project. Once the projects have been approved, a new activity will be created to track the narrative, financial, and statistical progress of the infrastructure project. The State will divide this activity into three funding phases, with the first phase will provide funding for "shovel-ready" projects that can begin relatively soon.

#### Location Description:

The Mitigation Grant will serve counties selected by HUD and the State that received significant damage from

recent storms.

HUD Most Impacted and Distressed (HUD MID): Charleston, Clarendon, Dorchester, Florence Georgetown, Horry, Marion, Sumter, Dillon, and Williamsburg

South Carolina Most Impacted and Distressed (SC MID): Berkeley, Calhoun, Chesterfield, Darlington, Lee, Marlboro, and Orangeburg.

### **Activity Progress Narrative:**

The Mitigation Steering Committee met during Quarter 2 2022 to review and approve Infrastructure projects from Phase 1 Round 2. During this round, 9 projects were approved. The State currently has approved 20 Infrastructure projects and awarded \$49,881,494.02, approximately 50 percent of the amount allocated to infrastructure. Some of these projects, such as the ones in the City of Dillon, have multiple projects consolidated into one DRGR activity. There are approximately \$50.1 million in remaining funds to be awarded. The next Mitigation application period will occur during April and May 2023.

**Activity Description:**

This Activity will focus on the City of Sumter's Crosswell Stormwater Infrastructure project, which was awarded \$2,104,636.00. The City will add in \$750,000, making the Grand Total Project budget \$2,854,636. The Crosswell Neighborhood has experienced flooding during everyday storms, with additional stress caused by large tropical storms. The project seeks to address this by increasing capacity of the existing storm drain lines and adding approximately 13,000 linear feet of new storm drain lines and inlets.

The infrastructure project will occur in Sumter County, which is a HUD-identified Most Impacted and Distressed County. It will be run by the City of Sumter. Its budget in DRGR is set at \$2,157,251.90.

**Location Description:**

Sumter, SC

**Activity Progress Narrative:**

Plans, specifications, and bidding documents are substantially complete for all phases. SCDOT encroachment and stormwater permits were also approved as well. Phase 1 of the project, which is funded with FEMA dollars, was put to bid over their budget from FEMA. Amendments to address this funding issue have been submitted to FEMA and are awaiting approval.

**Activity Description:**

This Activity will focus on the City of Sumter's Lafayette Stormwater Infrastructure project, which seeks to address flooding along Mile Branch between Lafayette Drive and US Highway 76. The scope of work includes constructing a new stormwater conveyance that's approximately 3,900 linear feet. Additionally, an existing 48" Corrugated Metal Pipe trunk line will be replaced with a new 60" Reinforced Concrete Pipe that will provide additional capacity and last longer. A 60" outfall will be installed as well, which will replace the area's currently undersized one.

The City of Sumter was awarded \$1,515,089.00 by the State and will administer the project. The infrastructure project will occur in Sumter County, which is a HUD-identified Most Impacted and Distressed County. Its budget in DRGR is set at \$1,552,966.23.

**Location Description:**

Sumter, SC

**Activity Progress Narrative:**

The City of Sumter Lafayette project plans, specifications, and bidding documents are substantially complete. It is still working towards putting the project to bid. Next quarter, the city anticipates submitting for wetland permits from USACE, encroachment permits from SCDOT, and stormwater permits, as well as submitting project documents for review by the State.

### Activity Description:

This Activity will focus on the City of Sumter's Miller Road Infrastructure Project, which seeks to create a new stormwater conveyance system to alleviate flooding in the area between Jackson Street, Broad Street, Miller Road, and Morgan Avenue in Sumter, SC. The lack of an outfall to Shot Pouch Branch is contributing to the flooding. The project will involve replacing the existing 48" Corrugated Metal Pipe storm drain outfall with 2,600 feet of new 54" Reinforced Concrete Pipe outfall and inlets.

The City of Sumter was awarded \$1,230,000.00 by the State and will administer the project. The infrastructure project will occur in Sumter County, which is a HUD-identified Most Impacted and Distressed County. Its budget in DRGR is set at \$1,260,750.00.

**Location Description:**

Sumter, SC

**Activity Progress Narrative:**

The City of Sumter Miller to Morgan project plans, specifications, and bidding documents are substantially complete. It is still working towards putting the project to bid. The project has obtained its SCDOT encroachment and stormwater permits. Next quarter, it will submit the documents for review and send the project out for bit upon State approval.

### Activity Description:

The City of Isle of Palms Stormwater Infrastructure Project seeks to minimize and eliminate wide spread flooding throughout the City. The Isle of Palms has experience increased occurrences of flooding due to heavy rainfall events, extreme high tides, sea level rise, high-water table conditions, and intense coastal storms. These conditions, combined with an inadequate drainage system and the low lying topography of the island, have create flooding conditions throughout the City. The Infrastructure project will focus on the area surrounding the 41st Avenue Outfall. infrastructure project is classified as Urgent Need and will be administered by the State. The Urgent Need project was awarded \$1,396,700 and will be budgeted at \$1,431,617.50 within DRGR. It is located in a HUD-identified Most Impacted and Distressed County.

## Location Description:

## Activity Progress Narrative:

The Isle of Palms Stormwater Infrastructure project underwent design modifications and plan updates in 2022. As part of this, they sought to increase the scope of their current project by an additional \$729,100, for a total amount of \$2,125,800. The amendment seeks to further protect critical infrastructure, which includes a fire station, by extending the length of the storm drain pipes by 423 feet to the limits of the right of way of 41st avenue. The amendment was approved by the Mitigation Special Case Panel and will properly be reflected in DRGR next quarter. Additionally, the project contract with Thomas and Hutton was executed on December 30th. Next Quarter, the project will begin preparing for the Environmental Assessment phase, complete designs of the new pipe system, and begin the permit application process.

### Activity Description:

UPDATE: Due to similarities in geography, effects, and goals, the Second Street and Washington activities were merged together into the Town of Cheraw's Stormwater Infrastructure Project. Within DRGR, this was done by removing the 5I15 Cheraw Washington activity and merging the finances and narratives to the Second Street activity. This activity was renamed as the Town of Cheraw's Stormwater Infrastructure Project.

The Town of Cheraw, using the information and data obtained from their Stormwater Master Plan, has identified several projects that can reduce damage from flooding and stormwater. The Second Street project area starts at the intersection of Second and Third Street and stops near the intersection of Second and Powe Street. Drainage improvements will include 35 storm drainage structures, 3,246 linear feet of stormwater pipe, 10,814 linear feet of curbing, and 4,773 square yards of required paving/resurfacing and is expected to provide around

155 acres of drainage relief for the town.

Additionally, the Stormwater Master Plan was used to identify another beneficial project at Washington Street. This project will begin by upsizing the downstream pipes under the Washington Street dirt road and CSX railroad, with project improvements continuing near the intersection of Front and Marlboro Streets and follow a general path around Church Street. The project will then branch off from the trunk line at Third Street and end at the intersection of Third and Market Street. The trunk line improvements will end on Green Street near Cheraw First Baptist Church. The project will provide approximately 190 acres of drainage relief to the town, which include building 51 storm drainage structures, installing 5,800 linear feet of stormwater pipe, rehabilitating 606 linear feet of preexisting stormwater pipe, and 18,695 square yards of required paving and resurfacing. Combined, the projects were awarded \$9,336,996.18. It is budgeted at \$9,422,845.51 in DRGR. The Low to Moderate Income focused projects will be administered by the State and will occur within a South Carolina-identified Most Impacted and Distressed County.

### **Location Description:**

### **Activity Progress Narrative:**

Due to project similarities and synergies, the Town of Cheraw Second Street and Town of Cheraw Washington and RR activities have been merged into one activity. The budgets for these two activities have been combined into one in DRGR. This quarter, the State held a public kick off with Davis and Floyd, who was contracted for the engineering services. They completed the survey of the 2nd street project and have begun the survey of Washington and RR. The firm has also conducted the Existing Conditions research and began developing the preliminary plan set. As of quarter end, the project is close to finishing survey work, begun the engineering design and environmental review phases, and started identifying required permits. Next quarter, the State anticipates having the survey and existing conditions research completed, finishing 60 percent or more of the engineering designs, and scheduling at least one public meeting.

### Activity Description:

Horry County seeks to address flooding from Socastee Creek, which has caused flooding from the 2015 Severe Storm, 2016 Hurricane Matthew, and 2018 Hurricane Florence disasters and cut off access to several local roads. Utilizing a grant provided by SCDHEC, Horry County initiated a study to address the flooding and discovered that waterflow is impeded as it passes under the McCormick Road. This project will construct a supplemental culvert under McCormick Road that would reduce the amount of water that is backed up during flood events. This Urgent Need project has been awarded \$846,450.00 and is budgeted at \$867,611.25 in DRGR. It will occur in a HUD-identified Most Impacted and Distressed County and will be administered by the subrecipient.

## Location Description:

## Activity Progress Narrative:

This quarter, Horry County held a kickoff meeting in November for the project. Survey work for the project is around 60 percent complete. Horry County and Thomas and Hutton, the selected engineering services firm, met in December to discuss initial work and to discuss alternatives to the design of the culvert. Next quarter, the county will continue survey work and will begin the engineering design phase.

**Activity Description:**

The City of Florence seeks to upgrade the stormwater infrastructure, which includes pipes, inlets, and junction boxes, within the vicinity of North Church Street and Oakland Avenue. Within this drainage basin there is little stormwater infrastructure within some areas, much of which is undersized for the area's needs. The project upgrades will provide efficient drainage to the area and help prevent future property damage, road closures, and road repair from flooding and water damage. This project has been awarded \$3,073,304.00 and is budgeted at \$3,150,136.60 in DRGR. The subrecipient will administer the Low to Moderate Income focused project, which is based within a HUD-identified Most Impacted and Distressed County.

**Location Description:**

**Activity Progress Narrative:**

City staff conducted a field investigation of known issues within the project area and has developed preliminary conceptual design solutions. They have selected an engineering firm, conducted their kickoff meeting, and are finalizing the scope of work. Next quarter, they will finalize the contract with the selected engineering firm and develop design solutions.

### Activity Description:

Dillon County seeks to improve the storm drainage infrastructure of the Riverdale Community, which is undersized and needs to be replaced with additional drainage capacity. The work will include around 5,500 linear feet of open channel and ditch widening as well as 1,000 linear feet of storm drainage lines and culvert crossings. This project was one of the projects identified within Dillon County's Stormwater Study. The State has awarded \$1,420,000.00 to the project and has budgeted the activity for \$1,455,500.00 in DRGR. The project will be administered by the State and will focus on the area's Low to Moderate Income population. It will occur within a HUD-identified Most Impacted and Distressed County.

### Location Description:

### Activity Progress Narrative:

The Dillon County Riverdale project has completed its procurement phase, with Weston and Sampson being selected as the engineering firm. The first monthly meeting for the project was held in late December, with a kickoff meeting occurring in January. Next quarter, the firm will begin survey and engineering design work.

### Activity Description:

Utilizing information acquired from its Stormwater Management Plan, the City of Dillon seeks to reduce flooding around the Dargan Street, Lucius Road, and South Railroad Avenue areas. This will be accomplished by installing new drainage pipes, upgrading the size of preexisting pipes, and widening the channel near Lucius Road. This Low to Moderate Income focused project was awarded \$3,846,000.00 by the State and is budgeted at \$3,942,150.000 in DRGR. The activity will be administered by the subrecipient. The City of Dillon is located in a HUD-identified Most Impacted and Distressed County.

### Location Description:

**Activity Description:**

This activity will focus solely on the city of Charleston’s Medical District Drainage Tunnel Extension at Ehrhardt Street. The city was awarded \$10,213,294.75 for this infrastructure project by the Governor’s Appointed Committee. The area is routinely impacted by substantial flooding that can prevent patients, emergency vehicles, and staff from reaching the hospital during a storm. In just 2019, the medical district had 89 flood events.

The tunnel will run beneath Ehrhardt Street on the Medical University of South Carolina's campus towards President and Cannon Streets. Water will go through this tunnel until it reaches the city's Spring/Fishburne drainage improvement project. The infrastructure project will be run by the city of Charleston. The activity in DRGR has been budgeted for \$1,791,372.00. Charleston is a HUD-identified Most Impacted and Distressed County.

**Location Description:**

Charleston, SC

**Activity Progress Narrative:**

The City of Charleston received its Notice to Proceed on April 4th and has completed mobilization at Ehrhardt Drive, Cannon Street, and Spring Street. This quarter, they completed to concrete placement for President tunnel bulkhead, removed bulkheads and plugged 9 out of 11 temporary outfall connections, commenced tunnel excavation, and coordinated with project stakeholders and the State. Next quarter, they will continue the tunnel excavation. The city hopes to possibly complete tunnel excavation and begin installing the tunnel lining before the end of next quarter.

Since the commencement of construction in 2022, this project will continue to record its labor hours for Section 3 reporting. While the State did not achieve its Section 3 goals for this quarter, it is making strong efforts towards these goals. It is attempting to recruit low income workers through advertising and reaching out to community organizations. Additionally, corrections are being made to include additional labor hours from the third Quarter that were not included. The addition of these 2,920 total labor hours does not significantly change the Section 3 reporting from last quarter. Quarter 4 had 8,937.5 Total Labor hours and 0 Section 3 or Targeted Section 3 hours. Efforts continue with attempts to recruit low-income residents around the area through local advertising media, signs prominently displayed at the project site, Section 3 information on the City of Charleston's Website, and in previous quarters, letters sent to business owners on the HUD Section 3 Business Directory.

### Activity Description:

This activity will focus solely on the City of Manning's Stormwater Improvement Infrastructure project. The Storm Drainage Improvements seeks to address flooding caused by an unnamed tributary of the Pocotaligo River by clearing and snagging unpiped sections, installing storm drain pipelines, culverts, and other new drainage structures. The State has awarded the City of Manning's project with \$4,979,555.00. The project will be run by the city. The City of Manning is located within Clarendon county, which is a HUD-identified Most Impacted and Distressed County. The activity in DRGR will be budgeted at \$5,104,043.88.

### Location Description:

### Activity Progress Narrative:

The Mitigation Special Case Panel approved an amendment to the scope of the project for additional drainage structures and rerouting drainage routes and outfalls. The approved amount has been increased by \$3,270,164, with the new total being \$8,241,725 for the project. The project, with the newer additions, is currently undergoing the design phase and has begun work on the Environmental Assessment. Stream restoration is currently on hold until more easement research and outreach has been completed with the property owners along the stream. Additionally, a public information meeting was held in September. Next quarter, the State anticipates completing the non-stream portion of the design and reviewing the Environmental Assessment preliminary documents.

### Activity Description:

This activity will focus solely on the Lake City Highway 52 Storm Drain Improvements project. It seeks to improve and enhance approximately 5750 linear feet of stormwater ditches and 3640 linear feet of stormwater pipes. The project will remove the existing inadequate drainage infrastructure. Lake City completed Phase 1A of its stormwater drainage goal in 2019, using \$755,212.71 from Penny Tax revenues. It seeks to use CDBG-MIT funds to complete Phase 1 and Phase 2 of its drainage project. The project will benefit the community by allowing surface flow to move more efficiently through the improved infrastructure and help prevent road flooding.

The remaining part of Phase 1 and Phase 2 will run by the State. The project has been awarded \$2,847,660.00 and is budgeted in DRGR for \$2,918,851.50. The Lake City Highway 52 Storm Drain Improvements project will take place in Florence County, which is a HUD-identified Most Impacted and Distressed County.

**Location Description:**

Lake City, SC

**Activity Progress Narrative:**

The contract bid documents for the Hwy 52 project were completed this quarter. Bid documents will be submitted to the Office of State Engineer once permits are in hand. Next quarter, the State anticipates completing the Environmental Assessment and publish the Finding of No Significant Impact and the Notice of Intent to Request Release of Funds next quarter, as well as obtaining permits and bidding out the project.

**Activity Description:**

This activity will focus on the City of Florence's McQueen Street Stormwater Infrastructure project. The City seeks to upgrade the 1930's era stormwater drainage system that serves the westside of downtown Florence and the neighborhoods along the South McQueen Street corridor. The project will involve repairing and upgrading the trunk line, upgrading and increasing the size of stormwater inlets, and upsizing or repairing drainage branch lines. This project will also work in synergy with another CDBG-MIT project at West Cedar Street.

The project is based out of Florence County, which is a HUD-identified Most Impacted and Distressed County. The City of Florence will administer the project and has been awarded \$2,685,334.00. The project's budget in DRGR is set at \$2,752,467.35.

### **Location Description:**

Florence, SC

### **Activity Progress Narrative:**

The City of Florence and its contracted firm has completed watershed delineations, Hydrologic and Hydraulic modeling, Survey and field investigations, concept plans, and preliminary estimates. They have begun preliminary discussions with SCDOT. Due to a significant increase in material costs, they are submitting a request for additional project funds. Next quarter, they will conduct a public meeting with the affected neighborhood and work on final design documentation, construction drawings, and the bid for the project advertised.

**Activity Description:**

This activity will focus on the West Cedar Street Stormwater Infrastructure project. The City of Florence seeks to upgrade the current stormwater infrastructure around West Cedar Street by running new reinforced concrete piping to the South McQueen Street basin in order to drain a current trouble spot, replace old catch basin infrastructure with more efficient ones, increase branch pipe sizes to accommodate increased flow from the new basins, and clean and repair damage pipes as needed throughout the existing system. This project will also work in synergy with another CDBG-MIT project at McQueen Street.

The project is based out of Florence County, which is a HUD-identified Most Impacted and Distressed County. The City of Florence will administer the project and has been awarded \$1,363,477.00. The project's budget in DRGR is set at \$1,397,563.93.

### Activity Description:

This activity will focus on the Mingo Pond Stormwater Infrastructure Project. Georgetown County seeks to prevent flooding and standing water along US-17 by installing 675 linear feet of new drainage infrastructure, a new pond outfall structure, and perform ditch maintenance on existing ditches in Pawleys Island. US Highway 17 is the primary north and south evacuation route going through Georgetown County and has previously faced standing water for several days because of storms.

The project will occur in Georgetown County, which is identified as a HUD Most Impacted and Distressed County. The project will be run by the State and has a budget of \$939,529.02. The project's budget in DRGR is set at \$963,017.25.

**Location Description:**

Georgetown County

**Activity Progress Narrative:**

During this quarter, the Georgetown County Mingo Pond project has completed the project Subsurface Utility Engineering phase, which looks for buried utilities and investigates potential project conflicts. Additionally, it has submitted bid documents to the South Carolina Office of State Engineer and are awaiting comments on them. Next Quarter, the state anticipates revising the bid documents per OSE comments and bid the project.

**Activity Description:**

This Activity will focus on Horry County’s Cowford Swamp Channel Infrastructure project. Horry County was awarded \$1,582,500.00 for this project. The Bucksport community faces flooding conditions when flood waters back up from the Pee Dee River into Cowford Swamp and the unnamed wetland tributary. The project will construct a tributary relief channel/culvert that would direct flood waters to an unnamed tributary wetland to the west and to the Waccamaw River, which has historically had lower water elevation changes than the Pee Dee River. This project will work in synergy with the Big Bull Landing Road CDBG-MIT project.

The project will be run by Horry County, which is a HUD-identified Most Impacted and Distressed County. The activity in DRGR has been budgeted for \$1,622,062.50.

**Location Description:**

Horry County

**Activity Progress Narrative:**

The public notice period for the SC DHEC OCRM CZC permit went from October 21 to November 1st, with the permit awaiting approval. As a result of this public notice, SCOR and SC DHEC received comments from community members and others expressing concerns about the impacts of the projects and the logistics of the project. A public meeting was held on December 8 in Bucksport to address the community concerns, with Horry County, the State, and Thomas and Hutton representatives in attendance. SCDHEC will be conducting a detailed review o the project and will conduct a public hearing in the future. Horry county is meeting with the ACOE to discuss the permitting required for the project.

#### Activity Description:

This Activity will focus on Horry County's Big Bull Landing Road Infrastructure project. Horry County was awarded \$893,750.00 for this project. Bucksport, the community where Big Bull Landing Road is located, receives significant flooding when the Pee Dee backs ups from storms. Horry County seeks to elevate Big Bull Landing Road to the adjacent high point grades that would make flooding less likely. It will also create a levee/dam on the existing drainage feature to prevent backup from the Pee Dee River.

The project will be run by Horry County, which is a HUD-identified Most Impacted and Distressed County. The activity in DRGR has been budgeted for \$916,093.75.
