

Resilience 101

The South Carolina Office of Resilience (SCOR) is offering in-person training sessions for elected/appointed officials and government staff members to discuss planning for and building resilience to flooding. This can count towards MASC continuing education training for local officials.

Training Topics Include:

Introduction to the SC Office of Resilience's statewide resilience planning & coordination, hazard mitigation, and long-term disaster recovery

Discussion and Definition of "Resilience"

- Characterizing community systems that build resilience
- Understanding shocks and stressors to the community and environment

Review of state and regional resilience programs

- Strategic Statewide Resilience & Risk Reduction Plan
- Watershed-Based Planning & Coordination

Presentation of local resilience-building examples communities may implement, including:

- Resilience Planning
- Infrastructure Projects & Improvements
- Voluntary Home Buyouts
- Conservation, Restoration, & Preservation
- Policy & Regulatory Processes

Connection with resilience resources

- First Street Hazard Modeling; flood, heat, wind, and wildfire
- Grants & Funding Opportunities
- Future Training Sessions

SCOR defines resilience as the ability of communities, economies, and ecosystems to anticipate, absorb, recover, and thrive when presented with environmental change and natural hazards.
