

SC OFFICE OF RESILIENCE

DISASTER RECOVERY RESERVE CORPS

OUR MISSION

Jumpstart the disaster recovery process by hiring and training a pool of highly qualified reservists who can be activated to assist survivors following a federally declared disaster. The Disaster Recovery Reserve Corps (DRRC) can be available to offer case management services after a disaster in as little as 30 days.

WHAT WE DO

Following a federally declared disaster, Reservists are activated to become a part of the SCOR **Disaster Case Management (DCM) team**. The DCM team provides a single point of contact to identify and facilitate access to a broad range of resources to address individuals' disaster-caused unmet needs.

Impacted individuals with needs ranging from housing repair, household goods, counseling services, and more work with a case manager who consults SCOR's extensive network of resource partners to help meet those needs.

Depending on the nature of the disaster, Disaster Case Management teams stand ready to conduct intake via phone or setup in-person intake sites in impacted areas.
